Core Problem

Patronaat as a pop podium recognizes the importance of effective communication to remain relevant in the online space. The organization is actively seeking ways to enhance its online presence through the development and management of appropriate online content. The challenge is to create and maintain an online presence that aligns with the identity and purpose of Patronaat while simultaneously engaging and resonating with the online audience. The primary goal is to ensure that Patronaat remains relevant and visible in the ever-evolving digital landscape. Based on the client's brief, the research started with a research question "How might we improve Patronaat's online communication and reach in order to stay relevant online?".

Methodology

We utilized various methods in our research to gain a deeper understanding and empathy toward the problem, our target audience, and other relevant topics. These methods included:

- Observation of events at Patronaat by noting down what we saw from the point of view of the visitor, and interviewing a couple of visitors about their likes and dislikes of the event and venue.
- Curated mood boards by members from the target audience of how they envision their perfect music venue.
- A cognitive mapping session in which participants were asked to create a visual representation of their mental model for the topic of music venues, and other music-related topics.
- A merge of two empathic research methods, a day in the life, and a photo diary. The methods consist of collecting qualitative data with the use of photos provided by members of the target audience regarding their behaviors, activities, and experiences at various music venues.

We interviewed a total of 16 members from the target audience in order to gain more insights using a curated topic list containing relevant questions on Patronaat, music, and music venues generally. Furthermore, we created a survey to collect quantitative and qualitative data and to help us find respondents for the interviews.

Based on the empathic research methods, interviewing, surveying, and desk research we came up with the content of this document.

Market Data

- **Market size:** The Dutch event market is dominated by music events, which constitute the largest segment in terms of market size. In 2021, the music venues generated total revenue of €107.3 million (Dee & Schans, 2022).
- **Revenue breakdown:** In 2019, the majority of revenue in the Dutch music venues market came from ticket sales (36%), followed by catering sales (22%) (Dee & Schans, 2022).
- **Popular genres:** According to a report by the Dutch Ministry of Education, Culture, and Science, the most popular genres in the Netherlands are, Classical Music, Electronic Music, Hip Hop, Jazz & Improvised Music, Pop & Rock, World Music (DutchCulture, n.d.).
- **Attendance:** In 2021, the music venues in the Netherlands organized a total of 5,571 events with a total of 883,166 live audience visits (Dee & Schans, 2022).
- **Impact of COVID-19:** The COVID-19 pandemic has had a significant impact on the Dutch music venues market, with many venues forced to close temporarily or permanently due to restrictions on public gatherings.

Players in The Industry

Patronaat recognizes that the music industry is a collaborative and interconnected ecosystem. Rather than viewing other music venues in the market as competitors, Patronaat views them as allies in promoting and celebrating live music. The venue is all about building a thriving music community that benefits both artists and audiences. Their approach to the music industry is one of collaboration and mutual support rather than competition. The following are some names of popular music venues in the Netherlands.

- Bitterzoet - Amsterdam
- Melkweg - Amsterdam
- Paradiso - Amsterdam
- P60 - Amstelveen
- Tivolivredenburg - Utrecht
- Doornroosje - Nijmegen
- Paard - The Hague
- Effenaar - Eindhoven
- Vera, Simplon - Groningen
- 013 - Tilburg

MELKWEI

When looking at the various websites of the venues listed on the previous page, it was interesting to see the different approaches each venue took with their online communication on their websites. The majority of them offer an option to view their website in English, which is a great option for an international audience as well as locals who may not be fluent in the Dutch language. Some of the other music venues' websites are more visually complex, such as the Melkweg website, with more features such as blog posts, photo galleries, and extensive menus. When it comes to the type of visuals used, almost every website has its own unique approach, while others follow similar styles. Many venues prefer to have their social media buttons on the top of the screen, so as soon as the user visits the page, it's easy to locate. Some websites like to use animations on their pages or inaudible videos automatically in the background of the page, which makes the page more visually appealing, such as Effenaar, Melkweg, and Bitterzoet. Others prefer static images and traditional approaches. What's also interesting to point out is how the venues list their events, in what order or structure. For some venues, like 013 in Tilburg and Doornroosje in Nijmegen, the events are listed on their landing page in a vertical chronological order in which it is easily seen when each event at the venue takes place or whether it is a sold-out event.

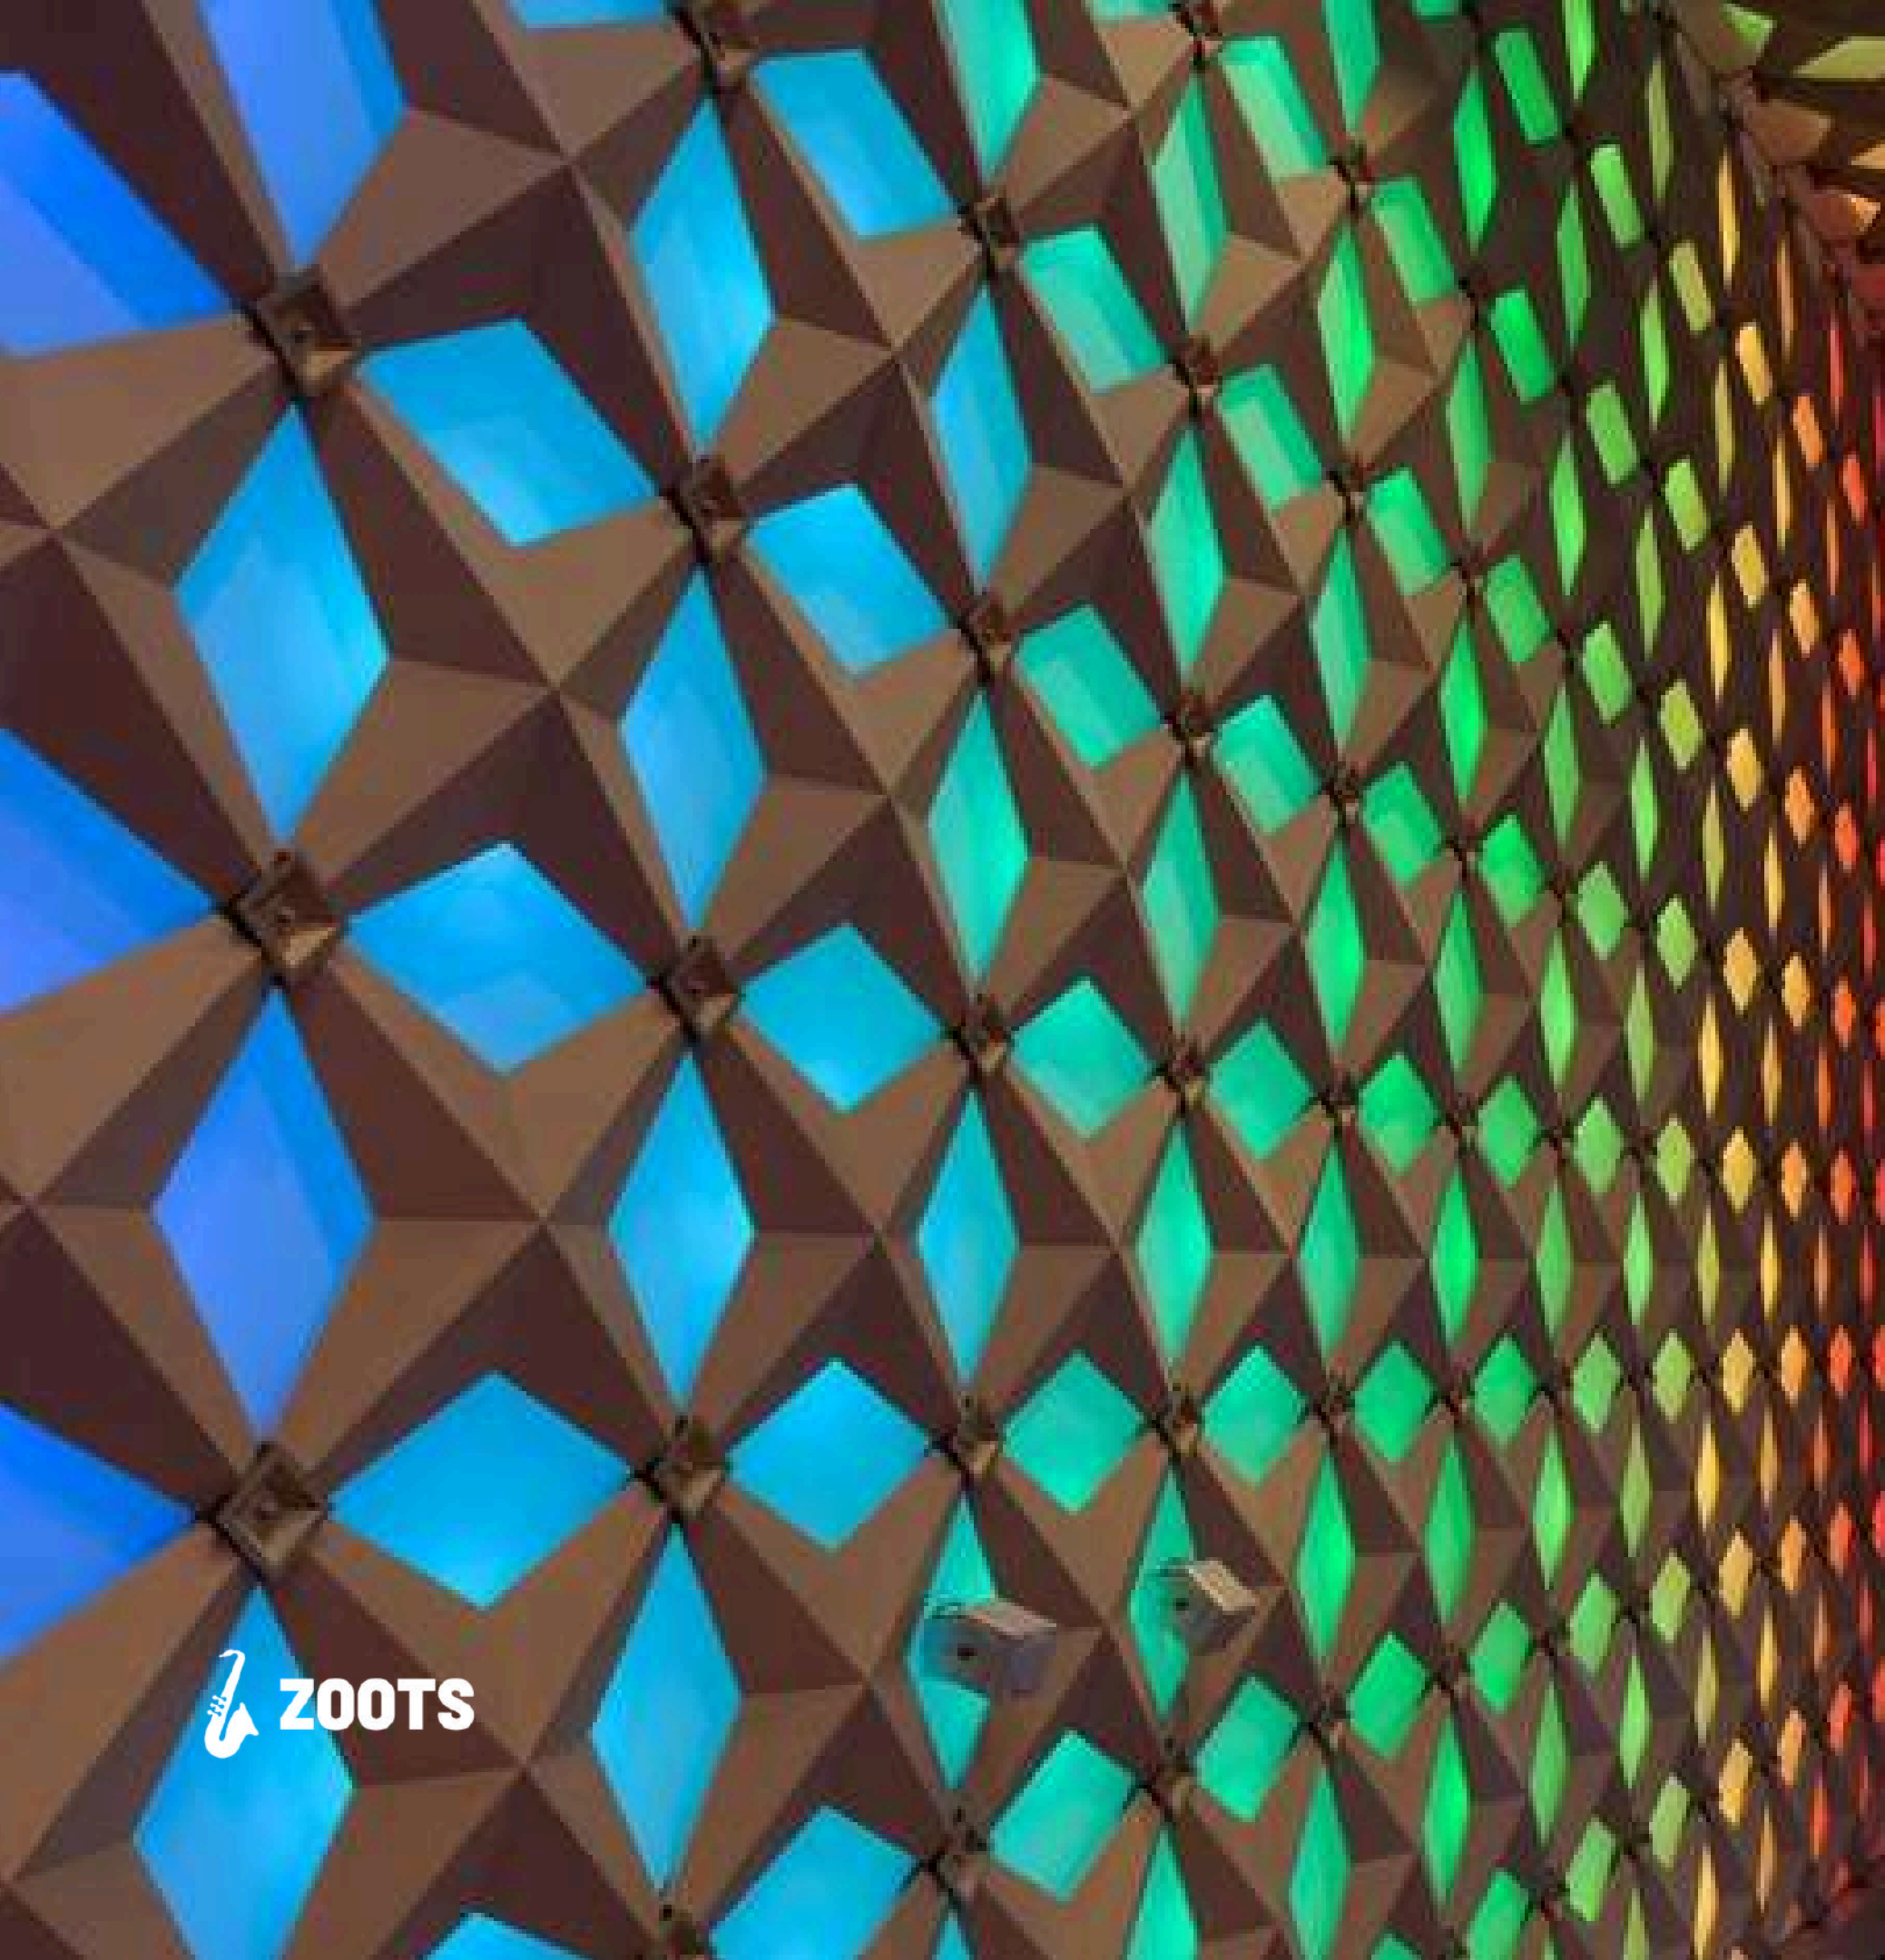

It is interesting to notice how some websites would make the perfect layout if merged together, such as the top part of the landing page of Effenaar's website, which includes an introductory video of the venue alongside videos of popular events and an advertisement of the venue's membership card, with the style of how 013 and Doornroosje structure their events' programs. When it comes to social media, different and similar styles are utilized by various venues. The most followed pages on Instagram are Paradiso (77k), Melkweg (54k), Tivoli (45k), Instagram 013 (31k), and Doornroosje (21k). One common factor among the most followed pages on Instagram is that they all share lots of lively, fun, and exciting-looking pictures of the events that take place at their venues in such an attractive way to visit, showing sides of the artists, the audiences, and remarkable moments such as a person in a wheelchair being carried by the audience in such a cooperative and enthusiastic way. Another thing to notice is whether the posts contain text in post-form, text-less pictures, or a combination of both. In conclusion, the online presence of these music venues plays an essential role in attracting, engaging, and the overall communication with the target audience.

Online Trends & Interactive Hybrid Experiences

The music industry has undergone significant changes in recent years, with the boost of social media and online platforms creating new opportunities for engagement and revenue (Sheikh, 2023). In this section, we will explore some of the top online trends and interactive hybrid experiences that Patronaat can adopt to reach a wider audience and generate additional revenue.

- **Influencer marketing:** Brands are increasingly working with influencers to promote their products and services (Geyser, 2023). One example could be having an influencer sponsored by Patronaat document their visit to one of the venue's events.
- **Short-form video:** Some trends include user-generated content, soundless optimization, behind-the-scenes videos, social media video ads, product teasers, influencer ads, explainer or educational videos, frequently asked questions (FAQs), and brand challenges (Mileva, 2023). One example could be to increase the use of IG Reels, TikTok (15–60 second) videos, etc. and perhaps consider joining other platforms like BeReal. Since social media trends are always changing, one needs to keep an eye on what is happening by being an active content lover and observer.

- Virtual events: Nothing compares to the experience of visiting Patronaat physically, but virtual events are one of the top trends currently, and they are a good way to prepare Patronaat for when times are challenging when physical attendance is not possible or just encourage people who live far away from the venue to visit.
- Merchandise sales: Making their own merchandise would not only be a way for Patronaat to get some extra financial support, but it could also be a way to market the venue. People would be seen wearing the merchandise or taking pictures of themselves wearing it and posting them on social media aka User-generated marketing.
- Interactive Social Media Campaigns: Music venues can create interactive social media campaigns that engage customers in real-time. The venue, for example, could ask customers to submit photos or videos of themselves at the venue and then feature the best submissions on their social media pages.

- Music Education Programs: Music venues can offer music education programs in collaboration with a university. One example could be InHolland that teaches customers how to play an instrument or produce music. These programs can be offered both online and offline and can be a great way to engage with customers and generate additional revenue.
- Podcasts: Some music venues are creating podcasts featuring interviews with musicians and behind-the-scenes stories. This is something that Patronaat has already tried, but it would be nice to have another take on it, perhaps with different content and more inclusion of an international audience.
- Live Streaming and virtual tip jars: To support musicians during challenging times when physical contact is less desirable, some venues have set up virtual tip jars where viewers can donate money during the livestream of an event on social media.

Ethical, Legal, & Technological Considerations

Ethical Considerations

As a music venue, there are several ethical aspects that should be considered to ensure that the business operates in a responsible and sustainable manner. Here are some of the most important ethical considerations for a music venue:

The safety of visitors and employees should be a top priority for any music venue. This includes making sure that the venue has adequate safety measures in place such as provision for safe passage of emergency / other vehicles through pedestrian traffic, adequate signage for entries, exits, toilets facilities, waste or recycling bins, first aid kits, and security personnel (Prism.fm, n.d.).

An ethical approach to data use involves improving the value for consumers while ensuring their safety and complying with privacy regulations. The approach should strive for continual improvement in the face of the increasingly dangerous digital environment (Fletcher, 2022).

Another ethical aspect is the fair treatment of employees. All employees should be treated fairly and with respect. This includes providing fair wages, benefits, and opportunities for advancement, as well as creating a safe and inclusive work environment that is free from discrimination and harassment (Netherlands Enterprise Agency, 2022). The Equal Employment Opportunity Commission (EEOC) enforces laws that prohibit employment discrimination based on race, color, religion, sex, national origin, age, and disability (Robbins et al., n.d.).

Music venues should strive to be inclusive and welcoming spaces for people of all backgrounds and identities. This includes booking a diverse range of artists and performers and creating a safe and welcoming space for LGBTQ+ individuals, people of color, and people with disabilities (Kumar, 2023). For example, to ensure inclusivity, make sure that the venue is accessible for individuals using wheelchairs and that all areas are easily reachable for those with mobility impairments. Additionally, strive to use inclusive language and avoid any language that may be understood as offensive or exclusive.

Music venues should take steps to reduce their environmental impact and promote sustainability. This could include using eco-friendly materials, reducing energy consumption, and promoting recycling and waste reduction (Mickletz, 2020).

Furthermore, music venues should be active members of their local communities, supporting local artists and organizations, and participating in community events and initiatives.

By taking these ethical considerations into account, music venues can operate in a responsible and sustainable manner that benefits both their customers and the wider community.

According to the client briefing with Jip Klompenhouwer-Degens, the Senior Marketing & PR, Patronaat is committed to sustainability and employs various measures to reduce its environmental impact. For instance, they use reusable plastic cups and branded Doppers instead of disposable plastic bottles. All lighting within the venue has been switched to energy-efficient LED bulbs, and Patronaat exclusively uses green taxi services that operate electric vehicles to transport their artists. Automatic lighting, heating, and taps are installed throughout the venue to conserve resources, as well as solar panels on the roof to generate renewable energy. Vegetarian or vegan food is the default option unless an artist explicitly requests non-vegetarian options. The venue also prints posters in-house on durable paper using sustainable processes to minimize paper waste.

Patronaat has had a gold certificate from Green Key since 2016, which is an internationally recognized quality mark specifically designed for the hospitality industry.

It's important that the inclusivity, diversity, and sustainability efforts are not coming from the intention of using the marketing strategies of green/pink/blue washings to the brand image (Henley Business School, 2022). Although even when the effort made did not come from that intention, it is important to take into consideration how to present Patronaat's efforts regarding ethical considerations, so that the audience doesn't misunderstand it as a green/pink/blue wash practice.

Legal Considerations

Based on the main issues of the client, Patronaat will have to be aware of a few legal implications when dealing with their online communication. The most vital parts refer to European data protection regulations (GDPR). All the data that they come in contact with can be only processed internally and only for its intended purpose (Upper House Of The Dutch Parliament , 2019) such receiving customer's address only to send a physical ticket to them. Moreover, in the Netherlands it's prohibited to send any messages and mails to the customer as they are protected by Telecommunications Act (KVK, n.d). The exceptions where Patronaat would be allowed to send messages, would be in cases where they received a prior consent from a person. Also, they would be able to reach out if the date, address or any other important information changed regarding an event someone was attending (Upper House Of The Dutch Parliament , 2019), such as postponing a concert.

When Patronaat asks for permission for processing customer's data, they are required to explain the purpose of its use as well as what can be done with that data (EU General Data Protection regulation). For instance, they could mention the cases described above.

Patronaat is allowed to take pictures of the audience during events and post them on their social media as the pictures are taken in a social setting in public venue (Upper House Of The Dutch Parliament , 2019). However, if they decided to take photos focused on specific people, they might be required to acquire permission to publish said picture. Additionally, before posting Patronaat's employees on social media and on the official website, it is essential to protect their privacy and gather their approval before publicly posting their personal data (EU General Data Protection regulation).

Technological Considerations

The following are a few technological considerations and trends that music venues should keep in mind when hosting events. By investing in the right technology, venues can continue to provide a high-quality experience for their audiences, even in challenging times (Music Business Worldwide, 2021).

- Live Streaming equipment: To host virtual concerts, music venues need to invest in high-quality cameras, microphones, and lighting equipment.
- Virtual event platforms: Music venues need to choose the right virtual event platform to host their online events, such as Zoom, YouTube Live, or Facebook Live.
- Mobile apps: Many music venues are developing mobile apps to provide a seamless experience for their audience, from purchasing tickets to ordering food, drinks, memberships or subscriptions, and packages.
- Augmented reality (AR): Some venues are exploring AR technologies to create immersive experiences for their audiences, such as interactive installations.
- Cybersecurity: Virtual events need to be secure and protected from cyber threats like hacking and data breaches.

Audience engagement tools: virtual events should have audience engagement tools like live chat and Q&A sessions to make the experience more interactive.

Wishes, Needs & Opportunities

Introduction

We've put the most important insights from all the research methods into 3 categories: needs, wishes, and opportunities. This way we make a distinction between elements that are necessary when attending a music venue and elements that would make someone's visit more pleasant. The lists have been ordered according to priority along with brief explanations provided.

Needs

- Good atmosphere, safe and inclusive environment: This is a fundamental need for any music venue, and ensuring that all visitors feel welcome and comfortable should be the highest priority.
- High-quality music, talented artists, and top-notch equipment: The quality of the music and the overall experience are key factors in attracting and retaining customers, so this is a very important need.
- Multi-language support for the venue's communication platforms: Given the international audience, providing clear communication in multiple languages is an important way to ensure that everyone can understand what is happening at the venue.
- More offers for students, such as discounted prices: This is a specific need expressed by the audience and is important for attracting and retaining younger customers.
- Posters and posts with an English option or at least a title: While important for communication, this need is slightly less urgent than the previous ones.
- Clear announcements on social media: Important for promoting events.
- Informing potential attendees when purchasing a ticket that lockers and toilets aren't included in the price of the ticket.

Wishes

- Reduce the price of either drinks or tickets to make the venue more accessible to a wider audience.
- Better advertising of events offline and online, including bigger posters with nicer designs, to promote events and attract a larger audience.
- Improve interior design, including decorations, to create an attractive atmosphere for visitors and provide a better backdrop for selfies and user-generated content.
- Including more international music genres that are underrepresented such as Shamstep, K-Pop, and C-Pop, to create a more diverse programming and attract a wider audience.
- More spaces for socializing to make visitors feel more comfortable and engaged.
- Unique events/avant-garde experiences that are worth traveling long distances for, to create a unique brand and attract a wider audience.
- Better ventilation of the venue as it gets too crowded, to improve the overall experience of visitors.

Wishes

- More interesting trending content on Instagram and TikTok to promote the venue and engage with audiences.
- Better recaps of events on social media such as in a form of IG reels, to promote events and engage with audiences.
- Interactive activities such as a photo booth, to engage visitors and provide additional opportunities for selfies and user-generated content.
- Offer workshops on creating music and cultural aspects, to provide valuable offerings for visitors.
- Be more present on other social media platforms such as Reddit, to promote the venue and engage with audiences.
- Consider doing after movies for events and videos of behind the scenes and employees so that the audience can see the type of people who work there, to provide additional behind-the-scenes content for visitors.

Opportunities

- Improving the communication platforms (website + social media): This opportunity is crucial to attract more attendees and increase ticket sales. By providing clear and concise information about upcoming events, artists, and the venue, the communication platforms can enhance the venue's image and reputation.
- Creating an app for memberships/subscriptions: An app can help the venue increase engagement with its audience, offer a seamless booking experience, and provide exclusive benefits to members. This opportunity can also help the venue collect valuable data about its attendees and tailor its marketing strategies accordingly.
- Showcasing Patronaat's sustainability efforts: As sustainability becomes increasingly important to many consumers, highlighting the venue's sustainability efforts can attract attendees who value environmentally responsible practices.
- Including parents in the target group: Collaborating with a nursery to provide child care services can expand the venue's target audience and make it more accessible to parents who want to attend events.
- Posting more behind-the-scenes footage: Providing behind-the-scenes footage can help build excitement and anticipation for upcoming events and provide a more personalized experience for attendees.

Opportunities

- Hosting more events that are free: Hosting free events can attract attendees who may not be able to afford paid events or who want to explore new artists and genres without committing to a ticket purchase.
- Showcasing fan-artist interactions on social media: This opportunity can help build a sense of community among the venue's audience and provide a platform for fans to engage with their favorite artists.
- More ads about upcoming concerts in the Randstad area: While advertising can be effective, it may not be the most cost-effective way to increase ticket sales, especially if the venue has a limited budget.
- Dedicated spaces for taking selfies at the venue: Important for online relevancy for example for user-generated content.
- Package tickets including the show, earplugs, bathroom, drinks, snacks, parking, etc.: While this opportunity can provide convenience for attendees, it may not be the most cost-effective or practical solution, especially if the venue has limited resources or partnerships with local businesses.

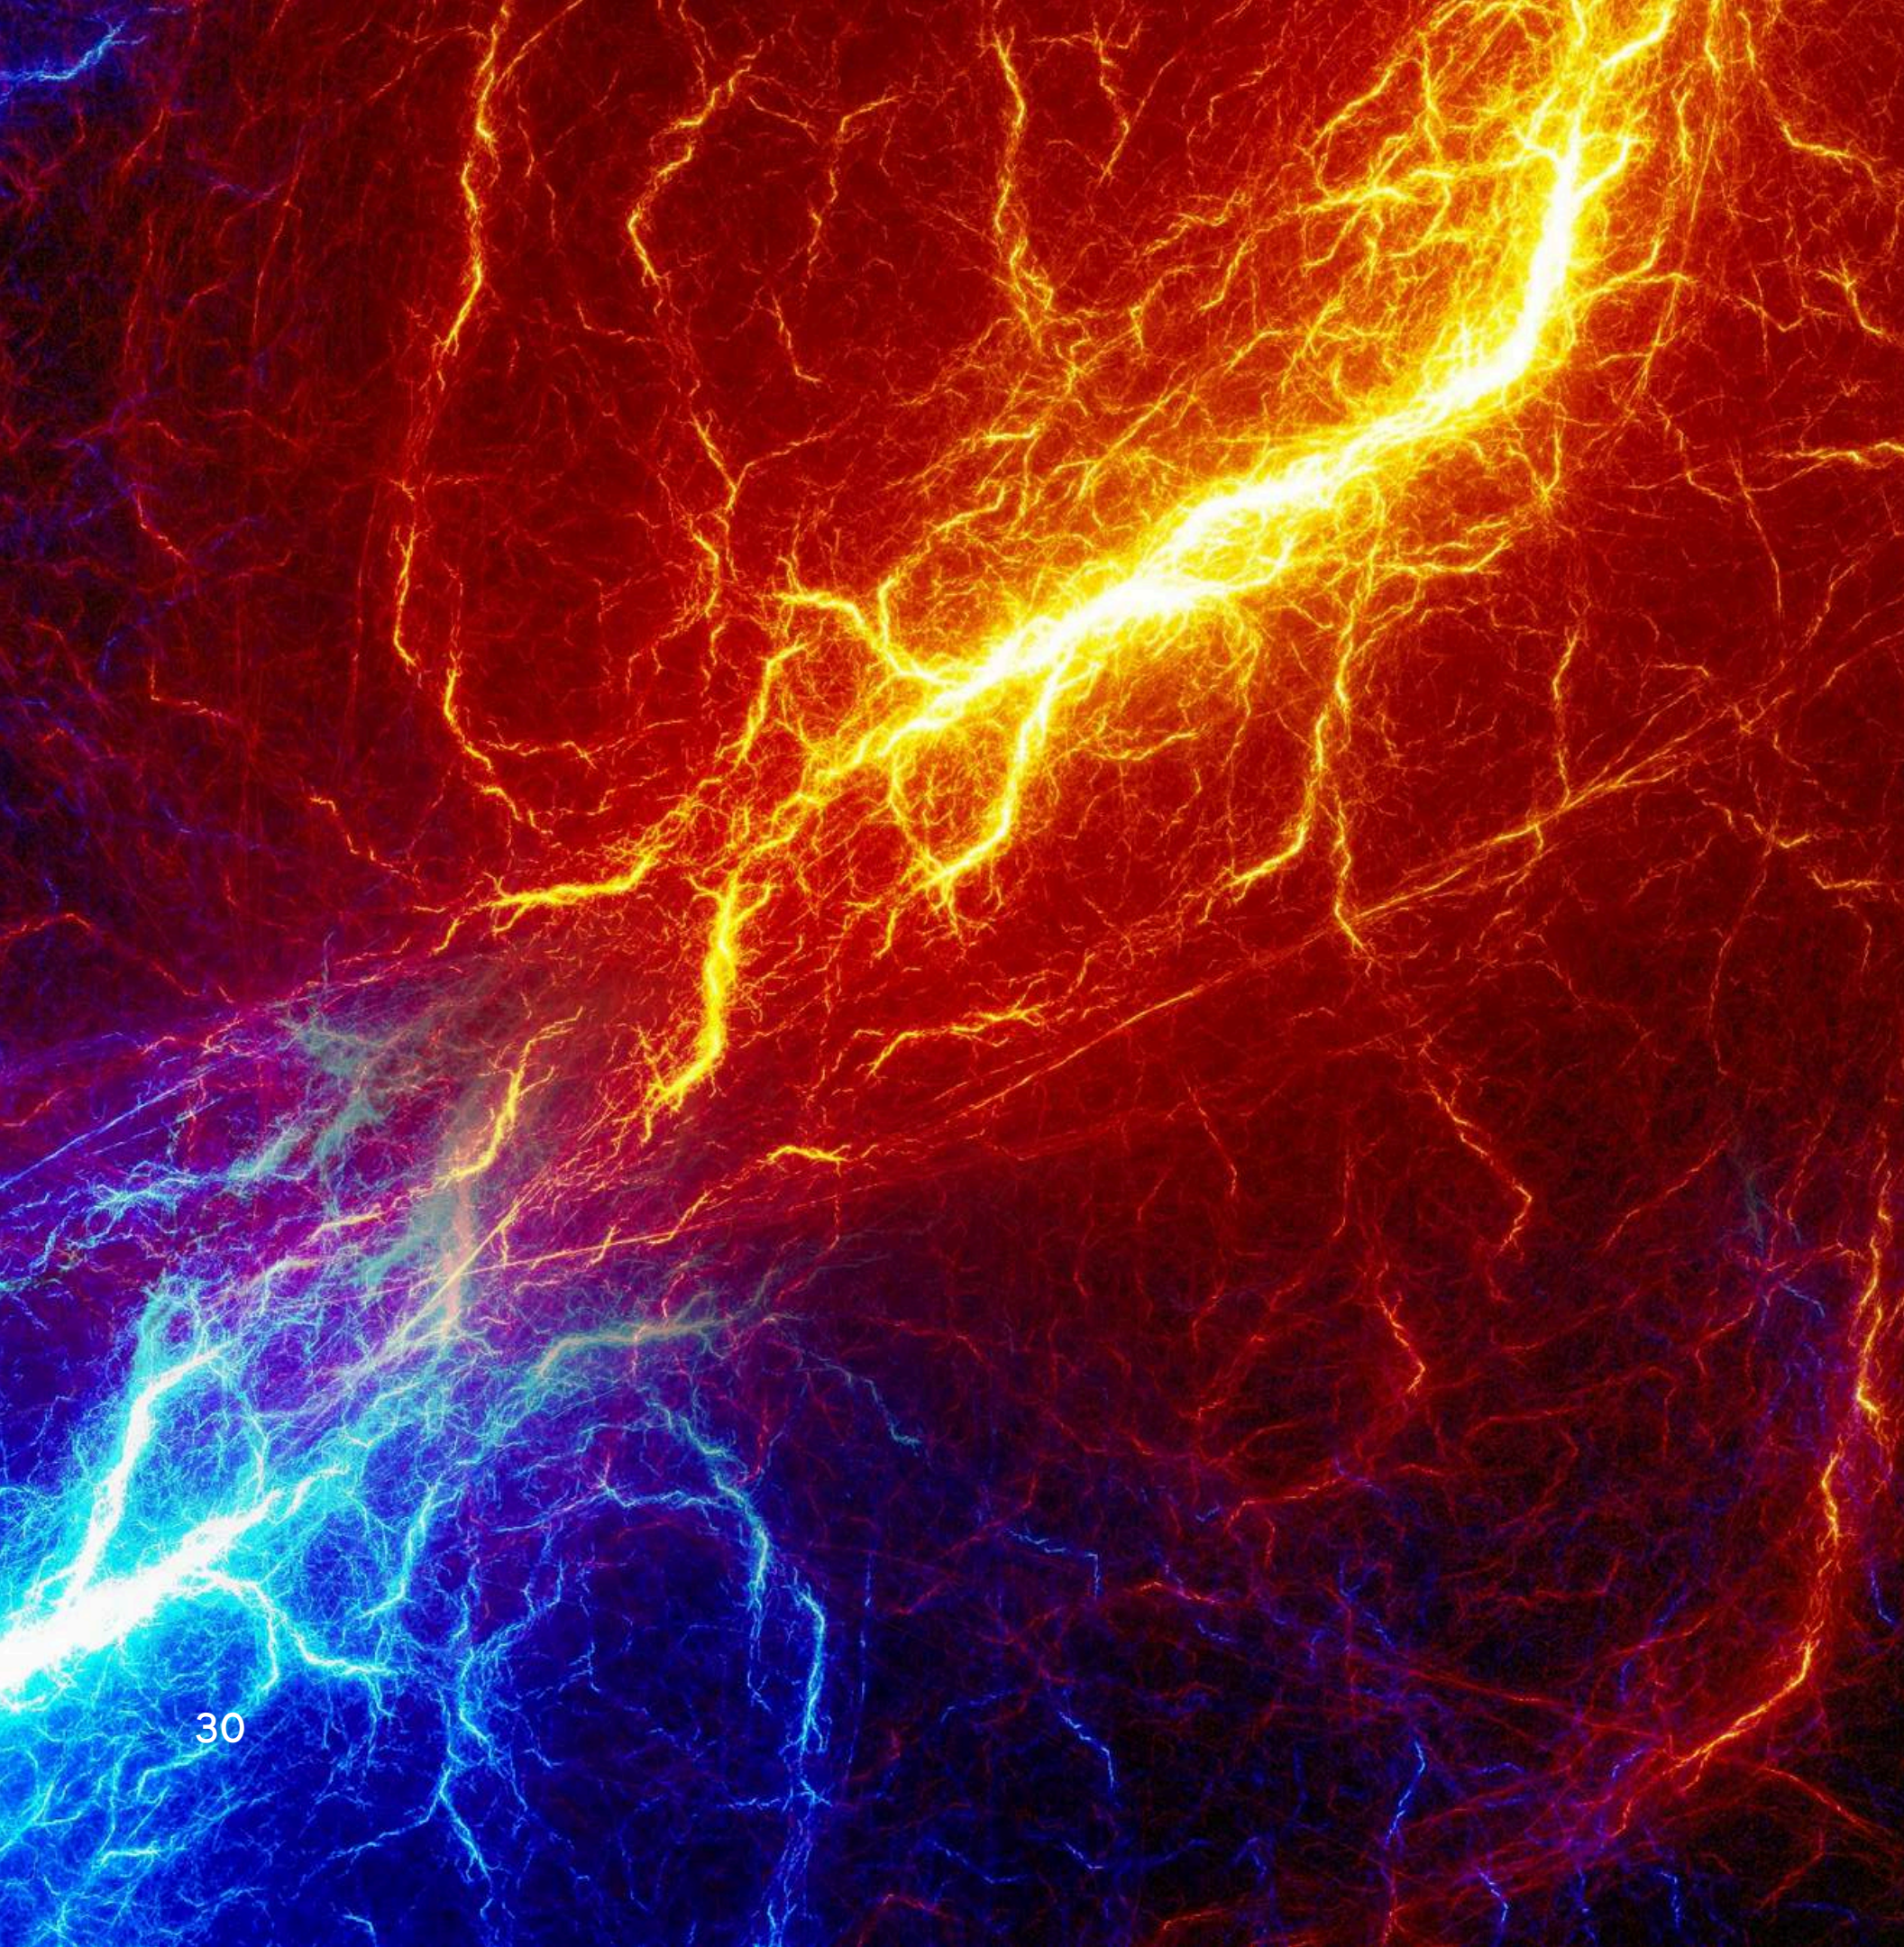

Design Question Redefinition

Design Question

Through the research, it became clear that the audience has a problem with not understanding Patronaat's content due to language barriers and focus on the Dutch audience which makes people feel not welcomed. Often, the problem is that since the information is all in Dutch, internationals tend to overlook announcements altogether and not feel motivated to translate or research more.

Moreover, the content on Patronaat's main accounts is vague and lacks a personal approach that would make people feel closer to the venue, the people working there, and their values. The format of posts seems repetitive and the audience would like to see more creativity behind the content.

Aside from online presence, some wishes and needs of the visitors were highlighted therefore should be included in further research. The audience likes that Patronaat supports local artists but would love to see more diversity, especially with foreign artists. Additionally, the audience would love to see more special events, aside from the concerts that Patronaat already hosts or to have more interactive activities within the venue.

Design Question

Those insights led to the formation of a new design question **"How might we improve Patronaat's online communication and reach by making internationals feel more included with a more creative, interactive, and personal approach?"**

Moreover, additional sub-questions were made based on other relevant insights but those would not be the focus of the research.

- How might we introduce a more diverse lineup in Patronaat's programming?
- How might we incorporate interactive activities for visitors at the venue?

Irisa

Single Mom
29, Venue Worker
Amstelveen, Netherlands

STATE OF MIND

Irisa is a 29-year-old resident of Amstelveen who enjoys going out with friends for a night of good music, drinks, and a nice atmosphere. She uses Google and social media pages to find events. Irisa used to go out a lot but has not been able to due to her busy schedule at work and being a single mom to a 2-year-old boy. She believes that music venues should promote diversity and inclusivity.

MOTIVATIONS

- + Quality music & performing artist & equipment
- + Friends attending, socialising
- + Avant-garde
- + Cosy and intimate atmosphere, inclusiveness.

STRUGGLES

- Websites only available in Dutch
- Venue too crowded
- Can't pay with cash
- Distance
- Underrepresented music genres

TOP GENRES

Pop

Hardstyle

Classical

Persona #3

- Name Colette Savatier
- Age 20
- Gender Female
- Education/Job international student with a part-time job at a cafe
- Location Haarlem
- Civil Status Single
- Music Genre mostly pop but listens to other genres, more interested in particular songs rather than artists or genres
- Online Platforms Instagram, Twitter, Tiktok, LinkedIn, Facebook (events)
- Motivations friends, music, reliable venue, social atmosphere (people have fun together)
- Challenges and Frustrations doesn't feel welcomed as most of online communication and ads are in Dutch, difficult to find any info
- Persona Bio

Collette is 20 years old and she moved from France to study in the Netherlands. She has a part time job at a cafe because she loves socializing with customers. In her free time, she hangs out with her friends, watches shows online and listens to a lot of music. She loves discovering new music and no genre is off-limits but she mostly listens to pop. She thinks it's important that she can sing along to the lyrics with others and that's something that she's looking for when she goes out. Because of that she mostly chooses parties where everyone can have fun together and bond, which is why she tends to go for 00s music or Latino events. Collette mostly gets information about events from posters she's outside or from her friends because she doesn't follow any venues. She mostly uses Instagram, TikTok and LinkedIn but she rarely sees any event ads. She doesn't mind traveling a bit to get to a venue but she doesn't want to go too far. What usually holds her back is the cost of the tickets and how much she would have to spend inside. She would love to see more ads in English (or at least main information) otherwise it doesn't catch her attention as she doesn't even know what the event is about. Also, she would like to see more international artists but they don't have to be big stars.

Persona #4

- Name Michael Galik
- Age 27
- Gender Male
- Education/Job Student of Economics
- Location Haarlem
- Civil Status Single
- Music Genres Techno, EDM, also likes commercial music but likes to listen to tracks which are focused more on music itself rather than the vocals
- Online Platforms Instagram, LinkedIn, Youtube, Soundcloud
- Motivations Chance to socialize with friends, listen to music with a good sound quality, and good atmosphere of the venue
- Challenges & Frustrations not enough information, difficulty to find information, the instagram profile doesn't give a welcoming vibe
- Persona Bio

Michael, who is originally from Hungary, moved to the Netherlands to pursue a master's degree in Economics. He currently lives in Haarlem and studies in Amsterdam. Although he used to socialize more frequently, his academic obligations leave him with little energy or time for partying. Nonetheless, he occasionally goes out with his friends, and during the summer, he enjoys attending festivals for the vibrant atmosphere. Michael's taste in music is quite diverse, with a preference for electronic tracks that highlight the instrumentals rather than the vocals. He tends to seek out lesser-known artists on Soundcloud, and his music choices vary depending on his mood. To discover events and festivals, he relies primarily on social media platforms such as Instagram and Facebook, occasionally LinkedIn. He is willing to travel for events as long as they are affordable, but his lack of fluency in Dutch makes it challenging for him to access events with non-English information. As an international student, he feels more welcomed when event information is available in English.

Persona #5

- Name Lucas Kortekaas
- Age 35
- Gender Male
- Education/Job Financial Analyst
- Location Amsterdam
- Civil Status Engaged
- Music Genres Rock, metal
- Online Platforms Facebook, Instagram
- Motivations: The bands that are playing
- Challenges & Frustrations Lack of intimate feeling when attending Patronaat, wish there were more spaces for socializing
- Persona Bio

Lucas Kortekaas is a typical Dutchie. He goes to work on his bike everyday and loves socializing with friends and colleagues at a bar or restaurant, preferably outside as soon as the first ray of sunshine comes out. He is a big beer guy, loves to try new brands and flavors whenever he gets the chance. He's recently gotten engaged to his now fiancée, Jennifer. Lucas loves living in Amsterdam, as there are many music venues he can attend there. However Lucas, being a very financially stable guy, doesn't mind traveling somewhere further to go to a concert, as long as he is guaranteed a good time. He always finds out about events through Facebook, because he thinks this social platform has a good layout for that. He attends Patronaat quite a lot as he thinks they have a great line up of both big and small artists. Lucas, as a Dutch speaker, doesn't face any problems at Patronaat, but his fiancée, as a non-Dutch speaker does. She has been living in the Netherlands a while, but doesn't understand the language fully yet. Therefore Lucas wishes the website and socials were also in English, as for him it wouldn't create any obstacles, but it would take them away for a lot of people.

Customer Journey

	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5	Stage 6
Actions	The customer becomes aware of the concert through a social media post, poster or through a friend.	The customer researches the concert and the artist on the internet to find out more information.	The customer decides to purchase the tickets. The customer purchases the tickets through an online ticketing platform.	The customer arrives at the concert venue, navigates through the entrance and security check, and receives their ticket. The customer explores the venue and its amenities. The customer waits for the concert to start and enjoys the concert and engages with friends/crowd.	The customer leaves the concert venue and navigates through the exit and transportation to go back home.	The customer reflects on their experience at the concert and shares their thoughts with friends or on social media. The customer receives an email or survey from the event organizer asking for feedback on the event. Recommends the music venue to his friends.
Emotions	Excited, but little bit confused because the website is all in Dutch and it is hard to find information	Happy as the customer finds information.	Feeling excited for purchasing the tickets but disappointed because of the lack of information.	Thrilled to see the concert	The customer feels happy and euphoric after the concert because of the overall atmosphere	Customers feel welcome to come to other events at the venue and feel the need to share it with his surroundings.
UX & Needs	Easy website navigation, availability, affordable prices, Multi-language support for the venue's communication platforms, Posters and posts with English option or at least title so internationals know what the event is even about.	An easy to use research engine that can make the website search process easy.	Easy to use with affordable prices and enough information, More offers for students such as discounted prices, There should be information when purchasing a ticket that lockers and toilets aren't included because some people didn't know they had to prepare to spend more money on those things.	Good place navigation, good sound quality, fast security check and friendly atmosphere , high-quality music, talented artists, and top-notch equipment	Feeling euphoric after the event and happy, Good atmosphere, safe and inclusive environment.	Sharing the experience with friends and looking for similar events.
