CHAPTER TWO: METHODOLOGY	11
CHAPTER THREE: ANALYSIS	14
APPENDIX A: RESEARCH PLAN	26

Description

We are .WAV Media group, formed in 2022.

The group consists of the following members: Angelo Werleman, Evyta Verweij, Angeline Chatelain, Britt Scheevers and Omar Abdulghani.

The following report is a data analysis of the artist Arcando, a Dutch EDM, Trap, and Pop, music producer launched in 2016 and is recognized for delivering next level tunes on a global scale (Arcando, n.d.).

Arcando

Angelo

Evyta

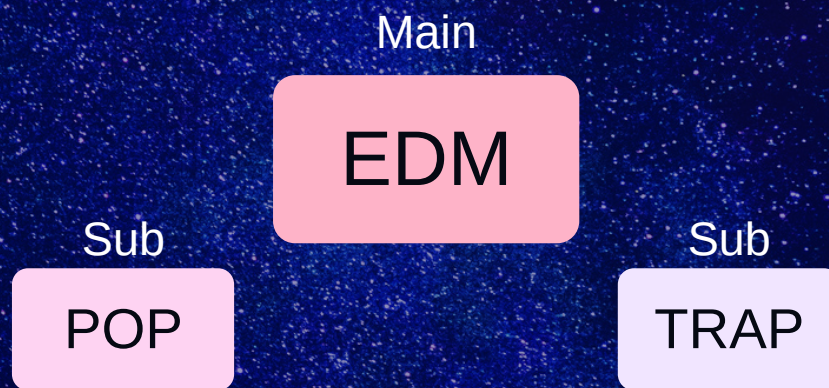

Angeline

Chapter 1: Introduction

This chapter is dedicated to introducing the artist, genre, history of the genre, main representatives and stakeholders, market share, trends, and developments. Alongside, describing the criteria or indicators of success and other relevant data.

1.1 Genres

1.2 History

Electronic Dance Music (EDM) dates to the 1960s. The EDM culture began at a Chicago disco and soon moved to Detroit and the rest of the world (Peake, 2018). Since that time, EDM has never stopped evolving. There are currently around 500 sub-genres of electronic music, including trap, hardstyle, future house, progressive house, and many others (DITM, 2022).

1.3 Main Representatives and Stakeholders

Names like Martin Garrix, Tiësto, Avicii, Skrillex, and Zedd spring to mind when one thinks about current EDM music. The genre has become immensely popular as a result of all of the musicians who play at the events, and EDM music festivals have also evolved into concerts. Many people who attend these events claim that it's not only about the DJs, but also about the entire festival experience. The top EDM festivals today are Tomorrowland in Belgium, Mysteryland in The Netherlands, Ultra Music, and Electric Daisy in The USA (Peake, 2018).

1.4 Market Share

According to the International Music Summit report written by David Boyle (2021), electronic music ramped up with record-breaking live streams. The recorded music market grew by 7% from 2019 to 2020. Highlighted in orange (Figure 1) is EDM market share in comparison with other genres. market size is estimated to be worth USD 2326.7 million in 2022.

Cross-Platform Actions by Genre in 2020

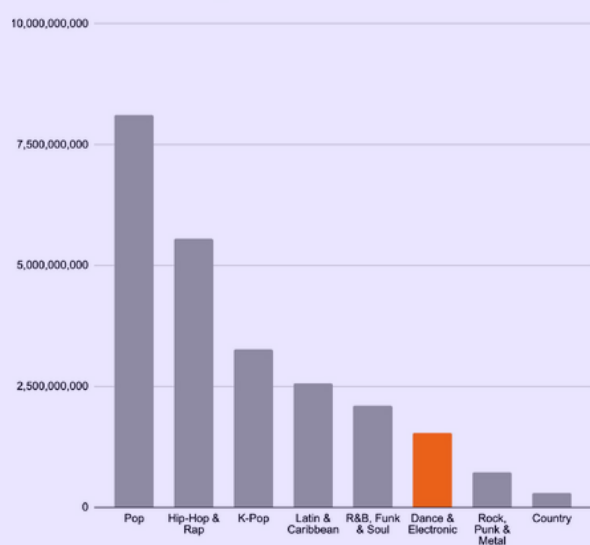

Figure 1, Cross platform Actions by Genre (Boyle, 2021).

1.5 Trends & Developments

Electronic dance music (EDM) is the most popular music genre in the world today (Noel, 2022). In 2020 electronic music expanded its representation and reach, but true diversity is a long road ahead (Boyle, 2021). Elements of EDM can today also be heard in various genres such as pop, rock, even metal, and other genres. Music enthusiast O Noel (2022) explains that trends of EDM music in 2022 include:

1.5.1 Trends & Developments in the Music Industry

According to Eliezer (2022), some of the trends in the music industry as of 2022 include:

New Ways To Find New Music

According to a YouGov poll (2022) done in the United States, 24% of gamers are already discovering new music in video games, a proportion that is predicted to climb significantly over the next 12 months.

TikTok

TikTok has been very big in the music industry. After a 59.8% increase in 2020 and a 40.8 percent increase in 2021, predictions say it will reach 1.5 billion to 2 billion monthly users.

NFTs (Non-fungible tokens)

Artists like Eminem took the lead in purchasing NFTs. NFT laws are expected to be implemented in 2022, according to industry participants. Australia is the tenth most NFT-interested country on the list.

1.5.2 EDM Trends

- Techno-Hype, is the most popular type of electronic dance music, with fast-paced beats. Trance music, which is frequently performed live, has powerful techno beats and a distinct rhythm that distinguishes it from other types of hard dance music.
- Hard Tech, Hard techno has been around for a long time, and despite the odd term, it has risen in popularity in recent years.
- Dubstep, Dubstep is another fantastic electronic dance music genre. It started out as an East African breakbeat-influenced movement, but it has since taken on a life of its own.

1.6 Success Criteria

More than anything, our own perspectives determine our level of success.

Due to its dual nature as both subjective and objective, success may be defined in a variety of ways. For the purpose of simplicity, Webster's Dictionary defines success as "the attainment of anything intended or desired," followed by "the attainment of riches, renown, or prosperity." (Brown, 2014). For the sake of this research paper the success indicators have been narrowed down to five:

1. Monthly Listeners Music Metrics

Part of being a successful artist today is making sure it reaches a wide audience by keeping track of the number of streams on various music platforms such as Spotify and Apple Music (Mejía, 2019).

2. Territory Growth

Today's artists need to tour to create territory growth since it is the best method to make money and is almost always more profitable than streaming or merch sales (Jonson, 2019).

3. Profile Followers

Modern artists are always looking for new ways to spread their work, and one of the most common methods is through social media. Artists can use social media as a platform to share their work and connect with people all around the world (Talladay, 2021).

4. Engagement

One of the most powerful creative forces in music today is artist collaboration. And if you're an independent artist seeking to reach a larger audience, it's definitely one of the most strategies ways to do so (Ravell, 2020).

5. Music Blogs and Podcast Reach

Today, press release marketing provides artists with another low-cost means of promoting their work and achieving success. Press release marketing, when done correctly, will drive visitors to the artist's website and improve track popularity (Schinder, 2021).

1.7 Profile of Icon: Martin Garrix

Martin Garrix, a member of the early-2010s wave of Dutch electronic music artists, spins a bright mix of progressive house, electro, and future bass. With his worldwide multi-platinum song "Animals" from his first album, Gold Skies, he broke through in 2013, and EPs like 2016's Seven and 2018's Bylaw reached the Billboard dance charts (Chartmetric, 2022).

1.7.1 Monthly Listeners Music Metrics

Martin Garrix's music reaches over 21.5 million listeners a month (Chartmetric, 2022). (Figure 2)

1.7.2 Territory Growth

According to Chartmetric (2022), Martin Garrix has performed at more than 500 events and festivals including Tomorrowland, Hurricane Festival, Ruisrock, Ultra, VELD, Bonfire Festival, and way more.

Spotify

Figure 3, Social media stats (Chartmetric, 2022).

17.3 Profile Followers

According to Chartmetric data (2022), Martin Garrix has over 15.5 million followers on Instagram, 700 thousand followers on TikTok, and 14.3 million subscribers on YouTube (Figure 3).

17.4 Engagement

Martin collaborated with many artists such as Tiesto, Brooks, Zedd, Valurr, Bebe Rexha, and way more.

17.5 Music Blogs and Podcast Reach

According to Chartmetric data (2022) Martin Garrix appeared in over 100 news articles from various DJ-related media outlets.

1.8 Profile of Arcando

Marc Bandecchi. Born in The Netherlands. Started in 2016. Makes music in the EDM, Trap, and Pop genres.

Achievements

Marc's top hits and remixes have together topped 100+ million plays across all platforms, with steady radio broadcasts across the world. With official remixes for A-list artists like R3HAB, Flux Pavilion, Josh A, and Tritonal, his music has attracted the attention of "Martin Garrix," "The Chainsmokers," "David Guetta," and a slew of other industry heavy hitters. His pop track "Rebel" has also been synchronized with the Netflix show "Deaf U." (Arcando, n.d.).

1.8.1 Target Audience: EDM

The age of the audience is the most evident aspect in determining the target audience for electronic dance (Mulatya, 2020). The genre is aimed at the younger generation, with 72 percent of males and 28 percent of girls between the ages of 16 and 25 years old. These figures are from Brigit Gunton's book "Target Audience Research." (2021).

According to a recent Google research (2021), in 2020, EDM channel subscribers on YouTube climbed by 60% on smartphones, 77 percent on TVs, and 175 percent on gaming devices. From January to July 2020, interest among 35- to 49-year-olds increased by 80%, despite the fact that the target audience is between the ages of 16 and 25.

1.8.2 Target Audience: Arcando

Arcando's music has been synced in a lot of video games such as "Army" (2019), "All The Right Moves" (2020), and "Jenny" (2019) therefore, one can presume that Arcando's target audience falls under the video gamers category.

According to a study poll done by VGChartz (2021), 38% of gamers still belong to the 18-34 age group.

1.8.3 Fanbase

The majority of Arcoando's listeners on Spotify are located in the USA, Germany, and Australia (Figure 4).

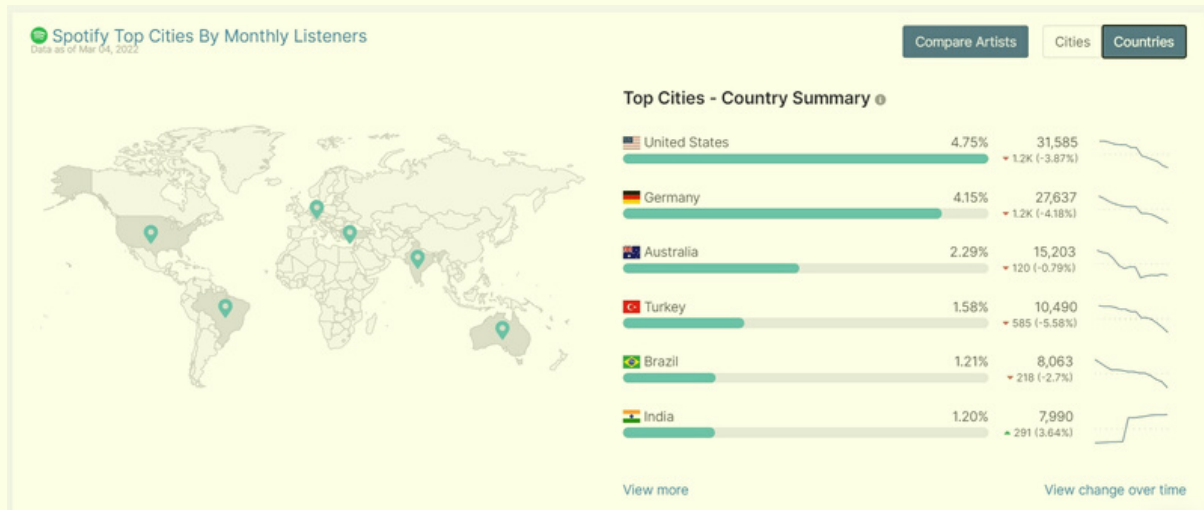

Figure 4, Demographic stats (Chartmetric, 2022).

According to Chartmetric data (2022), the majority of Arcoando's listeners fall under the 18-24 age group (Figure 5).

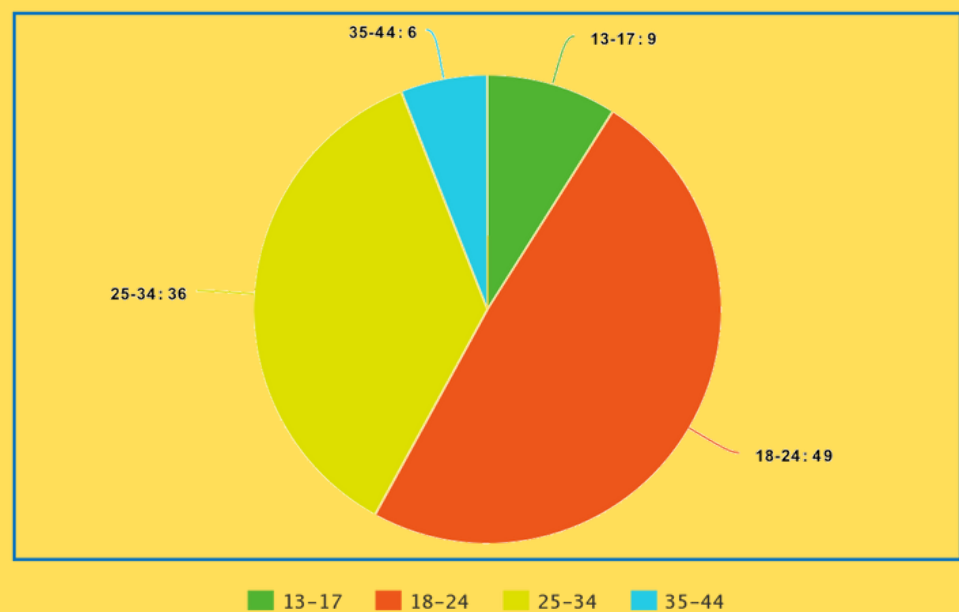

Figure 5, Target audience age groups (Chartmetric, 2022).

1.9 Stakeholders

NCS, Armada Music, Revealed Recordings, Trap Nation, Future Generation, Artist Manager, artist collaborators, and more.

1.10 Ambition Level

The ambition level is based on a comparison with a genre icon to assist comprehend Arcando's ambition level. Martin Garrix is now at the top of the EDM charts, and he's a great model to use to measure Arcando's ambition.

Arcando still has to achieve 7 million followers and 10 million monthly listeners to catch up to Martin Garrix. Martin Garrix has a fan conversion rate of 71.67 percent, compared to Arcando's 1.59 percent. To keep up with Martin Garrix in terms of playlist reach, Arcando still has to hit over 60 million playlists (Figures 5 and 6).

Spotify	
Followers	15.4M (77th)
Monthly Listeners	21.5M (158th)
Popularity	81/100 (338th)
Playlist Reach	205.3M
Fan Conversion Rate	71.67%
Reach / Followers Ratio	13.32x

Spotify	
Followers	10.6K (71,300th)
Monthly Listeners	668.5K (11,810th)
Popularity	55/100 (14,404th)
Playlist Reach	8.3M
Fan Conversion Rate	1.59%
Reach / Followers Ratio	779.72x

Figure 6, Martin Garrix Spotify stats (Chartmetric, 2022). Figure 5, Arcando Spotify stats (Chartmetric, 2022).

Chapter 2: Methodolgy

This chapter focuses on the research topics and approach, as well as an assessment of the entire process, as well as legal and ethical considerations. Refer to **Appendix A** for the research plan and **Appendix B** for the operating model.

2.1 Central question

How successful is Arcando within the EDM genre?

2.2 Sub questions

1. How many streams per month on Spotify does Arcando have?
2. How's the activity on YouTube for Arcando going?
3. How many followers on social media does Arcando have?
4. What do the viewers on YouTube say about Arcando?
5. What are Arcando's upcoming gigs and music?

2.3 Search Strategy

The research methodology is to describe the steps taken to answer the research main and sub-questions. In this research, qualitative and quantitative methods were utilized to collect relevant data. For instance, an interview with an expert in the field, Michele Yuen, a Business Intelligence Analyst at Chartmetric a firm that collects music and artist-related data from various sources. Interviewing is a common data collection method that is almost essential in qualitative research (Mathers et al., 2000). Moreover, desk research was implemented since it is important for comprehending the entire market structure and landscape (SIS International, 2020). To obtain more insights about Arcando various services like Chartmetric*, Spotify*, Socialblade*, and Google Trends* among others were utilized in the making of this research paper.

*Chartmetric collects music and artist related data from various sources

*Social Blade is a website that tracks social media statistics and analytics.

*Google Trends is a website by Google that analyzes top search queries in Google Search.

*Spotify is a Swedish audio streaming and media services provider

2.4 Operationalization

The following figure is an operating model of the artist Arcando highlighting information regarding charts, geo-growth, listeners, playlists, revenue, followers, and other information (Figure 7).

Concept	Dimensions	Indicators	Question/Statement
 Arcando: EDM	Marketing + Sales	Charts	Top track "Army". Peak position 72.
		Geo Growth	United States, Germany, Australia.
		Listeners	658,359 monthly listeners on Spotify.
		Playlists	18 editorial.
		Revenue	Monthly \$2.08K+ on Spotify.
		Followers	25k including Spotify, TikTok, Instagram, & Twitch.
	Digital + Social	Growth	3.92% engagement rate on YouTube.
		Engaement	Popularity 55/100 (14,287th).
		Conversion	1.61% Fan Conversion Rate on Spotify.

Figure 7, Arcando data (Chartmetric, 2022).

2.5 Evaluation

In order to properly evaluate this research, big data is best described with the six Vs: volume, variety, velocity, value, veracity and variability. The quantity of data discovered is referred to as the Volume. The term "variety" refers to the many forms of data discovered. The speed of the data found is referred to as Velocity. The veracity of a data source relates to its trustworthiness. The usefulness of the data is referred to as the Value. The term "validity" relates to the data's correctness (Schaafsma, n.d.).

Volume

When looking at the Volume of information, Arcando has a total of 218,000 followers on social media, a total of 22.8M million streams on Spotify as stated in the Spotify Wrapped data (2021), and nearly 1,586,558 views on YouTube.

Variety

When looking at the Variety, several data sources were found. These include the number of followers, streams, views, comments, gigs and posts. Arcando has a total of 15 gigs, overall streams of 30 million types of engagement including streams and views on various platforms.

Velocity

When looking at Velocity, the artist accumulates 300 followers per month on social media on average, nearly 661.8K monthly listeners on Spotify (2022), and approximately 104.353K viewers on YouTube (SocialBlade, 2022).

Veracity

It's tough to get 100 percent accurate statistics since no one has access to the analytics of every YouTube channel for instance. To generate findings, estimates must be made via the use of statistics and data, services like Chartmetric and SocialBlade are quite reliable but always to an extent (James, 2021).

Value

The information gathered is quite valuable. Arcando's level of success and footprint may be judged using these data.

Validity

On SocialBlade, when it comes to tracking the number of video views Arcando's channel has received, SocialBlade is fairly precise. The subscriber gains, on the other hand, are less precise since they do not provide detailed numbers (James, 2021).

Interviewee Profile

Business Intelligence Analyst at. Chartmetric | Music Analytics | Silicon Valley, London, NYC, Seoul

"Always looking ahead to opportunities related to international business development, marketing, market research, and data analytics, preferably in the music, technology, and entertainment media

Recent Psychology graduate with a dual minor in Business of Entertainment, Media and Technology & Child and Adolescent Mental Health Studies. Born in the Netherlands, lived in Shanghai and Singapore, currently in New York." (Michele, n.d.).

2.6 Legal and ethical Requirements

This section is meant for noting any legal or ethical concerns about the data gathered and how it was utilized.

The General Data Protection Regulation (GDPR) is the world's most stringent privacy and security regulation. Despite the fact that it was designed and enacted by the European Union (EU), it imposes duties on enterprises everywhere that target or collects data about EU citizens. On May 25, 2018, the regulation went into action (Wolford, 2019).

According to MusiciansUnion (2021), some of the principles of data protection laws are:

- Principle one: Use data fairly and lawfully
All data generated from this report are strictly for academic research.
- Principle two: The person has given consent
During the interview with the field expert, consent was given by the interviewee to record the interview.

- Principle three: Keeping personal data accurate and up to date
When meeting people, it was examined to see if their data were up to date and correct.

All names of screenshots collected from YouTube were covered for privacy protection.

- Principle four: Data sourcing

All data utilized in this research has been sourced according to the APA (American Psychological Association) standards.

Chapter 3: Analysis

This chapter answers the central and sub-research questions while also outlining Arcando's footprint. The artist debuted in 2016 (Arcando, n.d.) with a total of 70 tracks in the genres of EDM, pop, and trap, including original and remixed songs (Chartmetric, 2022).

3.1 Discography

The top track of Arcando, released in 2020 and goes under the title "Army" which received a total of 16 million streams on Spotify (2022). The second most-streamed song which received 6 million streams on Spotify (2022) is a remix of the song "Habits (Stay High)" originally performed by the singer Swedish singer Tove Lo released in 2014 (Spotify). As for the third most-played song that goes under the name of "All the Right Moves" released in 2020 according to Spotify (2022).

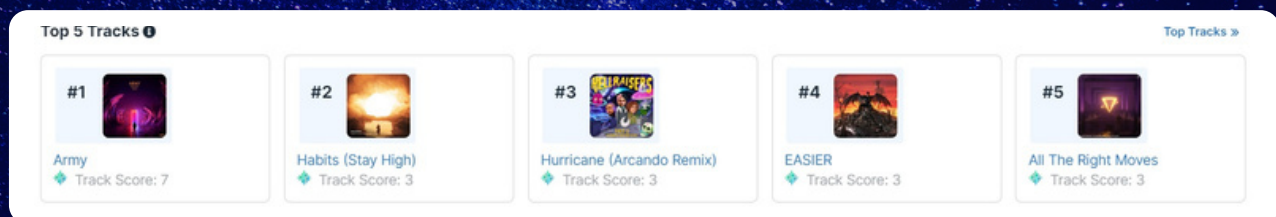

Figure 8 ; Arcando's Top 5 Tracks (Chartmetric, 2022).

3.2 Google Trends

According to Google Trends, in the period 2016 (Arcando launch) until 2022, Arcando was most searched in Google search engine in Argentina with Brazil in second place and Ukraine in third. There was a spike in 2019 with more than one hundred Google searches. No information can be obtained from Google Trends regarding search volume in The Netherlands (2022).

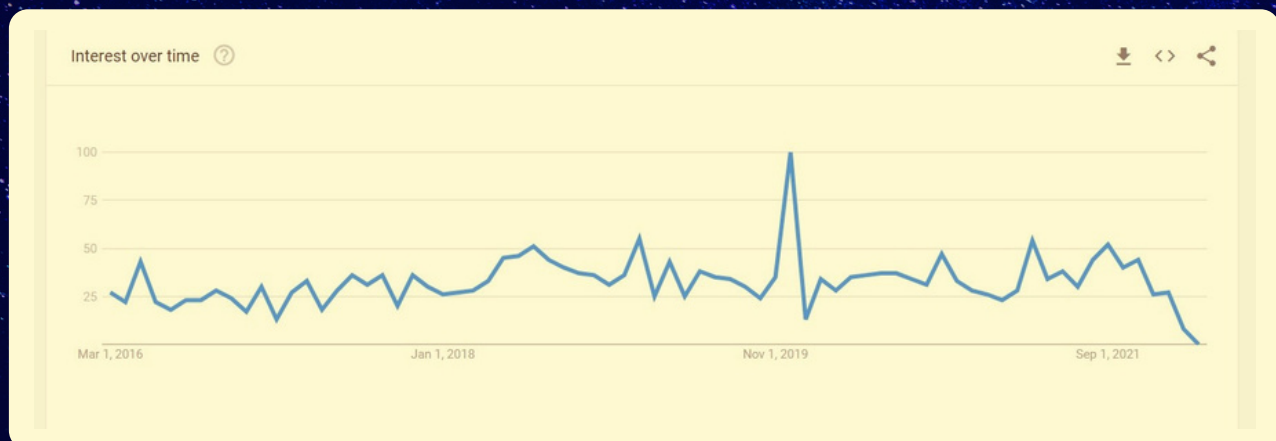

Figure 9 ; Arcando's Google search trends (Google, 2022).

3.3 Central question

- How successful is Arcando within the EDM genre?

→ Music Reach

Arcando reached 10k followers (2022). His music is most popular in Istanbul, Turkey with 7k listeners, Munich, Germany comes second with 6k listeners, and last but not least Sao Paulo, Brazil with 5k listeners and 17 editorial playlists (Spotify, 2022).

Figure 11, Arcando stats (Chartmetric, 2022).

Figure 10, Arcando stats (Chartmetric, 2022).

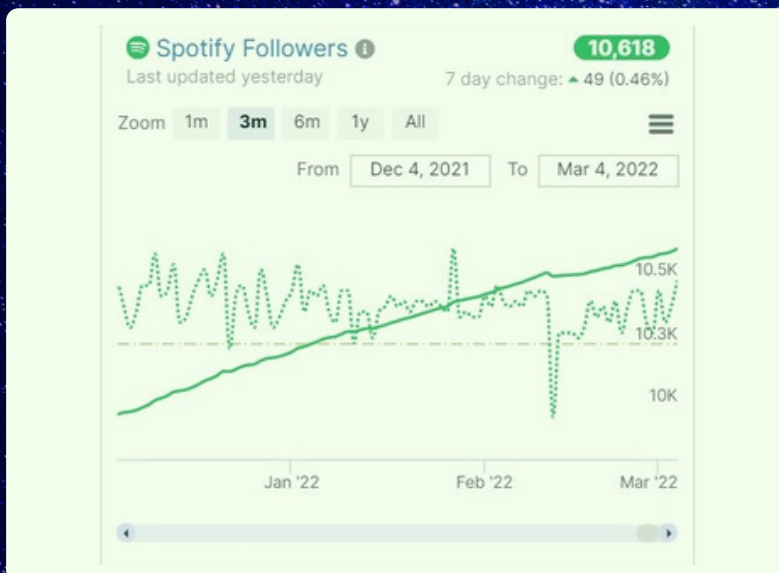

Figure 12, Arcando stats (Chartmetric, 2022).

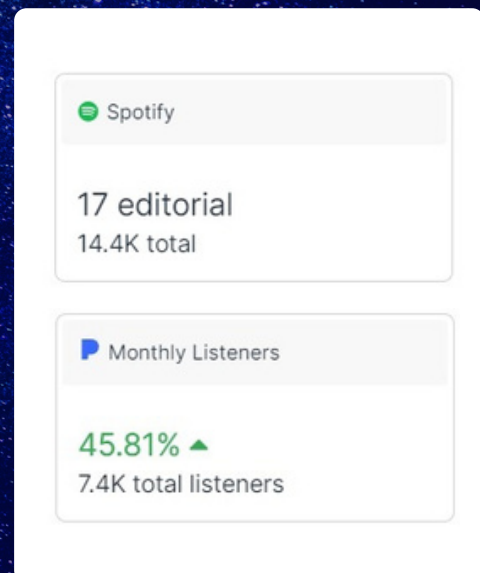

Figure 13, Arcando stats (Chartmetric, 2022).

→ Social Media Activity

Arcando can be found on Facebook, Instagram, YouTube, TikTok, Twitter, Spotify, Apple Music, SoundCloud, Deezer, and Twitch. On Twitch, Arcando live streams weekly making music on Ableton Live, a digital audio workstation for macOS and Windows developed by Berlin-based Ableton (Ableton, n.d.).

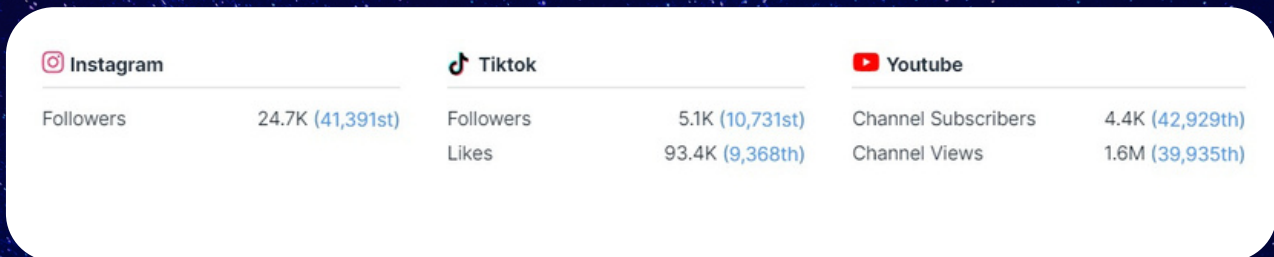

Figure 14, Arcando stats.(Chartmetric, 2022).

Figure 15, Arcando stats (Chartmetric, 2022).

Social media achievements as stated on SocialBlade (2022).

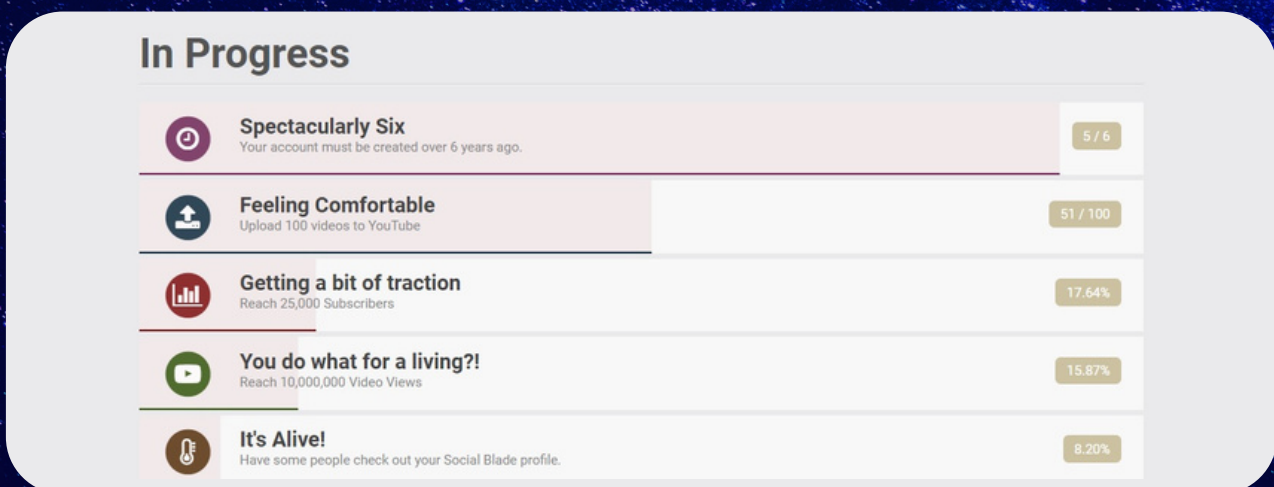

Figure 16, Arcando stats (Socialblade, 2022).

→ Touring and Live Music

Arcando performed at various Dutch venues/events some of which include Haring en Korenwijn in Leiden (2018), Amsterdam Dance Event (2018), Desmet Studios in Nieuw-Amsterdam (2018), and Club 55 (2016) in Vinkeveen. The artist regularly goes live on the following platforms: Twitch, YouTube, and TikTok. Arcando likes to show the process of creating music to his fans which he does in a form of vlogs on YouTube or chitchat sessions to communicate with his audience (Arcando, n.d.).

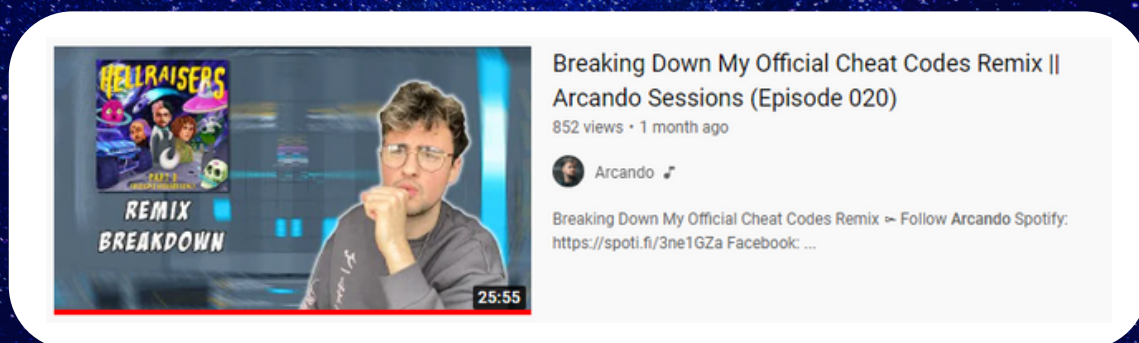

Figure 17, Arcando channel (YouTube, 2022).

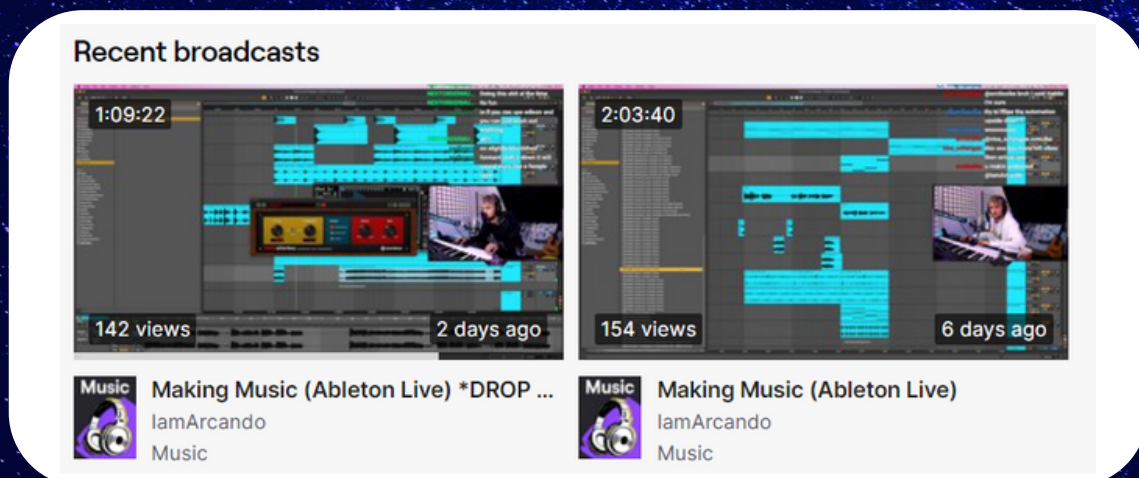

Figure 18, Arcando channel (YouTube, 2022).

→ Artist Collaboration

Arcando regularly collaborates with Cheat Codes, DJ duo from the United States that specializes in electronic music. Based in Los Angeles, the group consists of KEVI, Trevor Dahl, and Matthew Russell, most known for their single “Sex” released in 2016 (AllMusic, n.d.). Their most recent collaboration was in 2021 with the song “Hurricane” (Chartmetric, 2021). Other artists Arcando have collaborated with include but are not limited to; Grey, Tyson Ritter, Silent Child, Arc North, Flux Pavilion, Chime, spaceKDET, Layton, Neon, Ncrg, Bobby Khane, Quinn, JUNNY, Angelina Cortez, Karra, Lunis, Dhat Studd CC, and Tisoki.

→ Press Coverage

Arcando appeared in a total of seven articles written by different organizations some of which include: EDMReviewer (2018), HitsDailyDouble (2021), EDMProd (2021), YourEDM (2021), SkyN8 (2021), EarMilk (2020), and RiverBeats (2019).

3.4 Sub questions

1. How many streams per month on Spotify does Arcando have?

According to Chartmetric, Arcando reached over 1M Spotify monthly listeners (2020). According to Spotify, today Arcando receives 658,359 monthly listeners (2022).

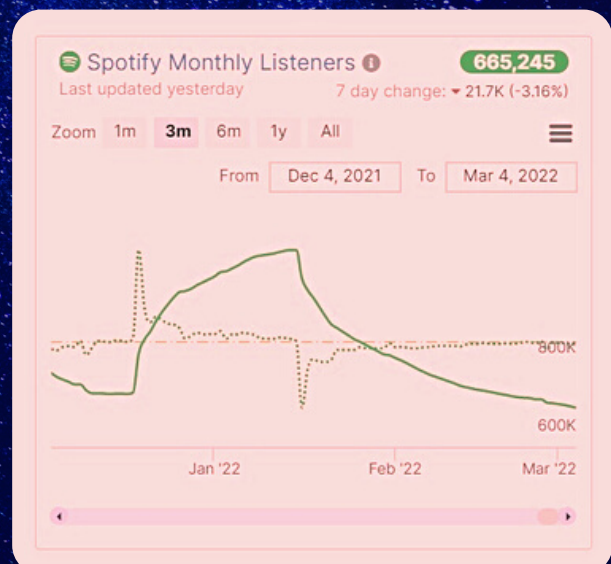

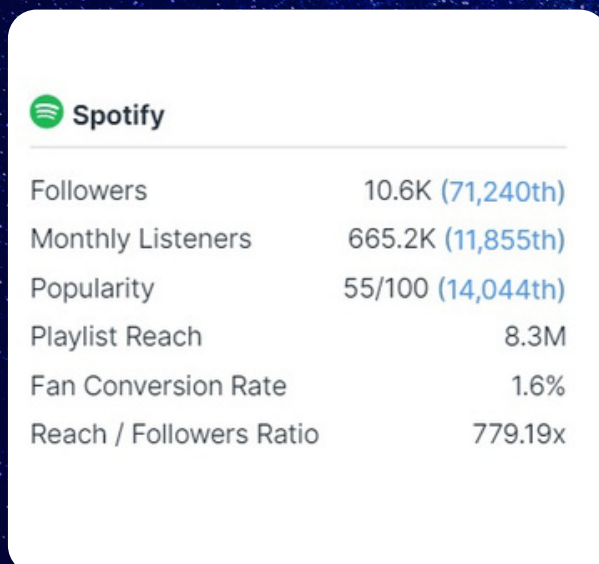

Figure 20, Arcando stats (Chartmetric, 2022); Figure 19, Arcando stats (Chartmetric, 2022).

2. How is Arcando's activity on YouTube going?

SocialBlade (2022) shows that Arcando channel was created on September 3rd, 2016. The artist has uploaded 51 videos on YouTube so far. Arcando's channel has over 4 thousand subscribers and a total of 1,5 million views. Estimated monthly earnings are between 24 and 380 earnings.

Figure 21, Arcando stats (Socialblade, 2022).

3. How many followers on social media does Arcando have?

Arcando has 24k followers on Instagram, 5k followers on TikTok, 4k subscribers on YouTube and 142 followers on Twitch (Chartmetric, 2022).

Instagram		TikTok		Youtube	
Followers	24.7K (41,391st)	Followers	5.1K (10,731st)	Channel Subscribers	4.4K (42,929th)
		Likes	93.4K (9,368th)	Channel Views	1.6M (39,935th)

Figure 22, Arcando stats (Chartmetric, 2022).

4. What are Arcando's upcoming gigs and music?

As of today, Arcando does not have any planned concerts yet to be found on his own website or other event websites. However, the artist is currently working on new music as he states on Spotify "New music coming soon" (2022), his last released song which already received 1.5 million streams on Spotify goes under the title "Easier" in which he collaborates with Josh A, a music producer born in 1996 in Orlando, Florida (Fantubia, 2020).

5. What do the viewers on YouTube say about Arcando?

On YouTube, Arcando uploads his music videos, breaks down his own music with tutorials, does live streams, and vlogs.

Arcando's viewers express their admiration for his music, for instance, one viewer mentioned "The original track is amazing, but... This version is a masterpiece!" (Levy, 2021) under the video "Arcando - Habits (Stay High) ft. Lunis [Lyric Video]" (YouTube, 2020).

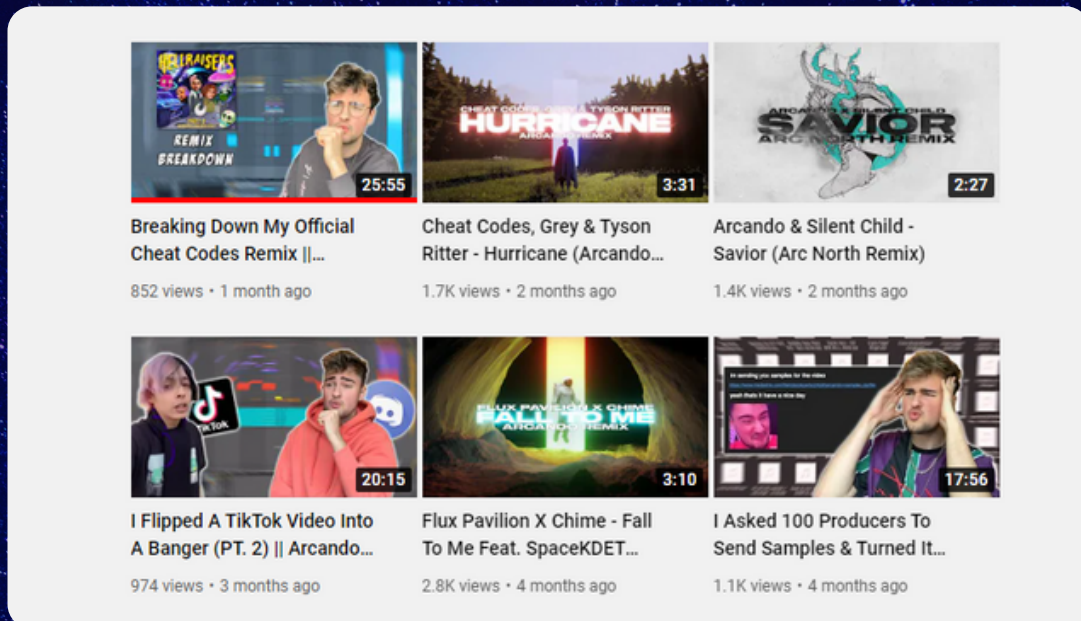

Figure 23, Arcando channel (YouTube, 2022).

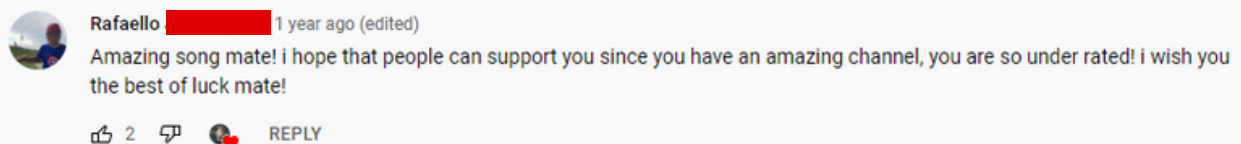

Figure 24, Arcando channel (YouTube, 2022).

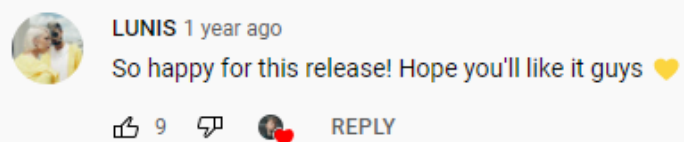

Figure 25, Arcando channel (YouTube, 2022).

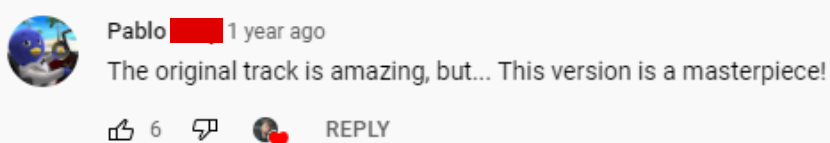

Figure 26, Arcando channel (YouTube, 2022).

3.5 Success Level

Based on the findings of this report's different studies, it can be stated that Arcando is a successful rising artist who is on the correct track to even greater success. He is constantly adding his songs to Spotify playlists. Arcando is quite active on social media, such as YouTube, where he publishes weekly videos and tutorials in order to increase his fan base and show different aspects of himself which is a good indication of success potentiality.

Spotify	
Followers	15.4M (77th)
Monthly Listeners	21.5M (158th)
Popularity	81/100 (338th)
Playlist Reach	205.3M
Fan Conversion Rate	71.67%
Reach / Followers Ratio	13.32x

Spotify	
Followers	10.6K (71,300th)
Monthly Listeners	668.5K (11,810th)
Popularity	55/100 (14,404th)
Playlist Reach	8.3M
Fan Conversion Rate	1.59%
Reach / Followers Ratio	779.72x

Figure 27, Martin Garrix Spotify stats (Chartmetric, 2022). Figure 28, Arcando Spotify stats (Chartmetric, 2022).

To help understand Arcando's success level, the success level is based on a comparison with a genre icon. Martin Garrix is now at the top of the EDM charts, and he's a wonderful benchmark against which Arcando's performance may be measured.

To catch up to Martin Garrix, Arcando still has to get 7 million followers and 10 million monthly listeners. Martin Garrix has a 71.67 percent fan conversion rate compared to Arcando's 1.59 percent. Arcando still has to reach over 60 million playlists to catch up to Martin Garrix in terms of playlist reach (Figures 5 and 6).

3.6 Conclusion and Recommendations

According to the interview held with Michele Yuel, a Business Intelligence Analyst at Chartmetric a firm that collects music and artist-related data from various sources, and findings of this report's study, the following conclusions and recommendations have been reached:

More collaboration

When two or more creatives collaborate on a musical endeavor, it is known as music cooperation. Collaborations might take place at any point during the creative process. It's one of today's most important creative forces in music. As an artist, you must recognize the significance of music cooperation and the benefits that this talent provides. For Arcando that would mean learning a new set of skills, increased productivity, expanding network and fan base (Levin, 2019).

More merch

Arcando is already selling merch on his website Arcando.com however, he could do more about this by expanding the variety of merch for instance. Doubling down on merchandise is another way to preserve revenue and relationships with listeners. Acts of all kinds have discovered new ways to connect with their audiences by creating unique products (Spotify, 2021).

Defining success and goals

Determining what success is, according to Michele Yuele (2022), may be extremely easy or very complicated, depending on what success means to an artist. Michele says that success is not always predictable; yet, she believes that there are success indications that may be directly related to measurements, albeit this is not always straightforward to determine. Some artists appear to be doing well in terms of analytics, and then everything changes in an instant. According to Michele, every artist must understand what success means to them and what their objectives and goals are. As a result, Arcando could benefit from this advice and have a clear set of goals/ambitions that he would like to achieve, which could provide him with better guidance when it comes to artist development.

Social media exposure boost

Arcando could personalize social media approach even more, maintain a regular publishing schedule, use material in a strategic way, be analytical and be a good listener to what his fans demand (ArtworkArchive, 2022).

Touring/Live streams

"Putting on a great live show is a solid way to engage people by giving them a memorable, in-person experience." (Black, 2018). With the expectation that the Covid-19 health crisis will be over soon, Arcando will have new opportunities to engage with his fans and present live shows that are more personal than live streams.
