The following university projects were developed in collaboration with external clients. I was responsible for research, concept development, prototyping, and execution, working directly with company stakeholders and decision-makers.

Featured Projects

UX/UI Design • Research • Prototyping • Branding • User Testing

PatronApp | 2022–2023

Patronaat | Haarlem, Netherlands

Developed **PatronApp** with Patronaat, a leading Dutch music venue, a mobile app concept **enhancing** the concert-goer experience through **interactive features**, **community building**, and **personalized event recommendations**.

Research • UX/UI Design • Marketing • User Testing

Amstelhof Connect App | 2024 - 2025

Amstelhof Sport & Health Club | Uithoorn, Netherlands

Collaborated with Amstelhof to design and prototype Amstelhof Connect, an **internal staff app** streamlining operations and **enhancing personalized member engagement** through features like **task management**, AI-powered communication, and **motivation tracking**.

Research • Strategy • Content Creation • Marketing • Branding

Brand Activation & Community Engagement | 2024 - 2025

MOES Tuinen | Amstelveen, The Netherlands

Developed a brand activation project with MOES Tuinen, an urban gardening initiative in Amstelveen, delivering a **pop-up stand**, **grow kits**, **flyers**, and **social media content** to **boost brand visibility** and **community engagement**.

Selected Achievements

- Designed **UX/UI** concepts for 5+ organizations in the Netherlands.
- Built mobile and digital product prototypes using **research** and **prototyping**.
- Applied **Google Analytics** to improve website insights.
- Combined UX design, **branding**, and **digital strategy** in client projects.
- Built a portfolio of UX/UI and digital product concepts, developing interactive prototypes with **React** and **Tailwind** using AI-assisted development tools (**Cursor** and **OpenAI Codex**).
