

Omar Abdulghani

Tech-Driven Creative Specialist | UX/UI Design | Full-Stack Web Products | AI Automation

Amstelveen, Netherlands | +31 6 36495599 | omarabdulgh@gmail.com

www.omarabdulghani.com/portfolio | www.linkedin.com/in/omar-abdelgani | github.com/omarabdulghani

PROFESSIONAL SUMMARY

International Creative Business graduate (BA, with merit) combining a minor in Digital Marketing and a two-year background in Information Technology. Uniquely positioned at the intersection of UX/UI design, growth strategy, and software architecture. Proven track record of directing both client-facing campaigns and complex, self-initiated full-stack web platforms. Highly adept at leveraging AI-assisted environments (Cursor, Claude Code, OpenAI Codex) to accelerate web development, integrate external APIs, and orchestrate conversion-focused product deployments. Bilingual in English and Arabic with intermediate (B1) Dutch. Authorized to work in the EU/Netherlands without sponsorship.

CORE SKILLS & TOOLS

UX/UI & Product Design: UX/UI Design, Wireframing, Rapid Prototyping, Interaction Design, User Flows, Journey Mapping, Value Proposition Design, Figma, Adobe XD, Framer, Canva.

Product Strategy & Operations: User Research, Stakeholder Interviews, Usability Testing, Project Coordination, E-commerce Operations, Web Optimization, QA/Testing.

Web & AI-Assisted Development: HTML, CSS, JavaScript, React, TypeScript, SQL, Python, Tailwind CSS, API Integration, Webflow, Playwright, Web Audio API, Cursor, Claude Code, OpenAI Codex, GitHub, WordPress.

Digital Marketing & Analytics: SEO, Google Analytics 4, Umami Analytics, Google Search Console, GTmetrix, Mangools, Hotjar, Conversion Optimization, Funnel Architecture, UX Audits.

PROFESSIONAL EXPERIENCE

Digital Marketing & Web Development Intern

Feb 2024 – Jul 2024

Park Plaza Hotels Europe – Amsterdam, Netherlands

- Executed a cross-property SEO strategy, delivering UX optimizations and content improvements across 15+ Park Plaza and partner hotel web properties, contributing to measurable organic traffic growth.
- Audited traffic performance using Google Analytics 4, Search Console, GTmetrix, and Mangools, surfacing 12+ actionable optimization recommendations that informed the marketing team's quarterly roadmap.
- Crafted interactive Figma concepts for 3 booking funnels, 5+ promotional landing pages, and 2 logo refinement proposals in collaboration with F&B, marketing, and web teams.
- Ensured website compliance across 15+ properties, overseeing cookie consent banner localization and supporting multilingual content updates in 4 languages.
- Deployed 20+ front-end updates, administered WordPress maintenance cycles, and built 8 HTML email templates for promotional campaigns.

Family Caregiving & Independent Product Engineering

Jul 2025 – Present

Amstelveen, Netherlands

- Completed an urgent family medical commitment abroad post-graduation; successfully concluded all responsibilities and returned to the Netherlands fully available for full-time corporate roles.
- Established a structured, full-time independent development workspace, leveraging an AI-native engineering pipeline (Cursor, Claude Code, OpenAI Codex) to architect, build, and deploy 4 production-grade software applications.
- Orchestrated the end-to-end execution, optimization, and launch of 4 distinct digital products: a conversion-driven e-commerce storefront (TheraNeck), a browser-native game (Moonlit Firefly Bloom), an autonomous Python sourcing

pipeline (Job Scout), and a responsive portfolio platform — collectively spanning 10,000+ lines of production code.

PRODUCT DEVELOPMENT & SELECTED PROJECTS

Job Scout AI Utility (Autonomous Sourcing Pipeline)

Jan 2026 – Present

Independent Project

- Engineered an automated Python job-searching utility within an AI-native development pipeline, leveraging Playwright to orchestrate autonomous browser instances that process 500+ listings daily.
- Integrated external data extraction and AI APIs to parse, structure, and filter live professional listings against 15+ complex profile criteria, achieving 90%+ match precision.
- Eliminated 10+ hours per week of manual sourcing workflows by establishing a clean data pipeline that calculates exact skill-matching metrics and exports ranked results.

Moonlit Firefly Bloom (Browser-Native Game Development)

Jan 2026 – Present

Independent Technical Demo & Architecture Project – moonlit-firefly-bloom.vercel.app

- Spearheaded the development of a browser-native 2D canvas game, leveraging Antigravity and OpenAI Codex to build complex TypeScript architectures from scratch without writing traditional code line-by-line.
- Architected a custom state snapshot pattern that decoupled 2,200+ lines of game logic from 3,200+ lines of procedural rendering, enabling independent iteration on 6 core gameplay systems.
- Oversaw the AI-driven implementation of mobile-responsive scaling, Web Audio API integration, and 4 virtual touch mechanics by systematically reviewing and refining generated logic.
- Applied advanced prompt engineering to effectively model 8 progressive gameplay mechanics, state machine transitions, and rendering math optimizations.

Personal Portfolio Platform (Responsive Web Development)

Jan 2026 – Present

Independent Build – www.omarabdulghani.com

- Conceptualized and launched a fully responsive portfolio platform showcasing 12 case studies, using Cursor and AI tools to execute the React and Tailwind CSS architecture.
- Shaped all UX/UI design decisions and guided the AI to implement 30+ modular components, achieving a 95+ Lighthouse performance score and sub-2-second load times.
- Curated and integrated a comprehensive showcase of 5 university client projects where I acted as the creative lead, alongside 7 self-initiated technical builds.

TheraNeck E-commerce Platform (Full-Stack Architecture & Market Validation)

Mar 2026 – May 2026

Independent Project – www.trytheraneck.com

- Led the complete build of a conversion-driven React storefront with 10+ pages, utilizing AI-assisted environments (Cursor, Claude Code) to rapidly iterate from concept to deployment in under 3 weeks.
- Architected the UX/UI and orchestrated the implementation of a strategic smoke-test funnel, integrating out-of-stock email captures that collected 50+ purchase-intent signals within the first month.
- Implemented Stripe payment infrastructure and Umami analytics dashboards to monitor real-time engagement across 5 conversion touchpoints and optimize the checkout experience.

Brand Activation & Community Engagement

Mar 2025 – Jul 2025

MOES Tuinen – Amstelveen, Netherlands

- Developed a localization marketing campaign targeting 2 distinct audience segments: Dutch residents and international expat communities in the Amstelveen region.
- Produced 15+ brand assets including grow kits, flyers, and digital content for a physical pop-up event that attracted 100+ attendees.
- Conducted 10+ bilingual interviews and user testing sessions to shape the final community activation strategy and validate messaging effectiveness.

Amstelhof Connect App (UX/UI & Concept Design)

Dec 2024 – Mar 2025

Amstelhof Sport & Health Club – Uithoorn, Netherlands

- Designed a high-fidelity Figma prototype spanning 25+ screens for an internal staff coordination and member engagement mobile app.
- Conducted user research with 15+ participants, surveys, and 3 stakeholder focus groups to inform the design of an AI-powered email assistance center, member profiles, and a task-tracking board.
- Aligned design deliverables with GDPR requirements and presented ROI deployment estimations to 4 senior stakeholders, securing concept approval.

PatronApp (Mobile App Prototype)

Mar 2023 – Jun 2023

Patronaat (Music Venue) – Haarlem, Netherlands

- Prototyped an Adobe XD mobile app with 20+ screens aimed at expanding international visitor inclusion at a 1,500-capacity music venue.
- Created 5 end-to-end user flows for event recommendations, community spaces, and multilingual concert details supporting 3 languages.
- Iterated on design details across 4 testing rounds based on feedback from 12+ user testing participants, accessibility rules, and venue stakeholder requirements.

EARLY PROFESSIONAL EXPERIENCE

Software Tester | Flavour x WarChild, Utrecht | 2018 – 2019

Teacher Assistant | Alkwin Kollege, Uithoorn | 2017 – 2018

Interpreter & Translator | Gemeente Amstelveen & VluchtelingenWerk | 2014 – 2019

EDUCATION

Bachelor of Arts: International Creative Business (Minor in Digital Marketing)

Graduated 2025 (With Merit)

Inholland University of Applied Sciences – Haarlem, Netherlands

Information Technology (BSc Programme - 2 Foundational Years Completed)

2018 – 2020

Inholland University of Applied Sciences – Haarlem, Netherlands

Teacher of English Studies (BEd Programme - 1 Foundational Year Completed)

2017 – 2018

Utrecht University of Applied Sciences – Utrecht, Netherlands

LANGUAGES & CERTIFICATIONS

Languages: English (Fluent, C1/C2), Dutch (Intermediate, B1), Arabic (Native).

Certifications: Google Analytics 4 Certificate, Google Fundamentals of Digital Marketing, IELTS Certificate, B1 Dutch Language Certificate.
