PROFESSIONAL SUMMARY

International Creative Business graduate (BA, with merit) combining a minor in Digital Marketing and a two-year background in Information Technology. Uniquely positioned at the intersection of UX/UI design, growth strategy, and software architecture. Proven track record of directing both client-facing campaigns and complex, self-initiated full-stack web platforms. Highly adept at leveraging AI-assisted environments (Cursor, Claude Code, OpenAI Codex) to accelerate web development, integrate external APIs, and orchestrate conversion-focused product deployments. Bilingual in English and Arabic with intermediate (B1) Dutch. Authorized to work in the EU/Netherlands without sponsorship.

CORE SKILLS & TOOLS

UX/UI & Product Design: UX/UI Design, Wireframing, Rapid Prototyping, Interaction Design, User Flows, Journey Mapping, Value Proposition Design, Figma, Adobe XD, Framer, Canva.

Product Strategy & Operations: User Research, Stakeholder Interviews, Usability Testing, Project Coordination, E-commerce Operations, Web Optimization, QA/Testing.

Web & AI-Assisted Development: HTML, CSS, JavaScript, React, TypeScript, SQL, Python, Tailwind CSS, API Integration, Webflow, Playwright, Web Audio API, Cursor, Claude Code, OpenAI Codex, GitHub, WordPress.

Digital Marketing & Analytics: SEO, Google Analytics 4, Umami Analytics, Google Search Console, GTmetrix, Mangools, Hotjar, Conversion Optimization, Funnel Architecture, UX Audits.

PROFESSIONAL EXPERIENCE

Digital Marketing & Web Development Intern

Feb 2024 – Jul 2024

Park Plaza Hotels Europe – Amsterdam, Netherlands

- Executed SEO strategy, UX optimizations, and content improvements across 15+ Park Plaza and partner hotel web properties.
- Analyzed traffic performance and generated actionable audits using Google Analytics 4, Search Console, GTmetrix, and Mangools.
- Designed interactive Figma concepts for booking funnels, promotional landing pages, and logo refinements in collaboration with F&B, marketing, and web teams.
- Maintained website compliance, oversaw cookie consent banner localization, and supported multilingual content updates.
- Deployed front-end updates, managed WordPress maintenance, and HTML email templates.

Family Caregiving & Independent Product Engineering

Jul 2025 – Present

Amstelveen, Netherlands

- Dedicated a temporary period post-graduation to managing an urgent family medical commitment abroad; successfully concluded all responsibilities and returned to the Netherlands fully available for full-time corporate roles.
- Established a structured, full-time independent development workspace, leveraging an AI-native engineering pipeline (Cursor, Claude Code, OpenAI Codex) to architect, build, and deploy complex software applications.
- Managed the end-to-end execution, optimization, and launch of four distinct digital products: a conversion-focused e-commerce storefront (TheraNeck), a browser-native game (Moonlit Firefly Bloom), an autonomous Python sourcing pipeline (Job Scout), and a responsive portfolio platform.

PRODUCT DEVELOPMENT & SELECTED PROJECTS

Job Scout AI Utility (Autonomous Sourcing Pipeline)

Jan 2026 – Present

Independent Project

- Engineered an automated Python background job-searching utility within an AI-native development pipeline, leveraging Playwright to orchestrate autonomous browser instances.
- Integrated external data extraction and AI APIs to parse, structure, and filter live professional listings against complex profile criteria.
- Eliminated manual pipeline sourcing workflows by establishing a clean data pipeline that calculates exact skill-matching metrics.

Moonlit Firefly Bloom (Browser-Native Game Development)

Jan 2026 – Present

Independent Technical Demo & Architecture Project – moonlit-firefly-bloom.vercel.app

- Directed the development of a browser-native 2D canvas game, leveraging Antigravity and OpenAI Codex to build complex TypeScript architectures from scratch without writing traditional code line-by-line.
- Architected and implemented a custom state snapshot pattern that decoupled 2,200+ lines of game logic from 3,200+ lines of procedural rendering.
- Oversaw the AI-driven implementation of mobile-responsive scaling, Web Audio API integration, and virtual touch mechanics by systematically reviewing and refining generated logic.
- Mastered advanced prompt engineering to effectively model progressive gameplay mechanics, state machine transitions, and rendering math optimizations.

Personal Portfolio Platform (Responsive Web Development)

Jan 2026 – Present

Independent Build – www.omarabdulghani.com

- Conceptualized and directed the deployment of a fully responsive portfolio platform, using Cursor and AI tools to execute the React and Tailwind CSS architecture.
- Led the UX/UI design decisions and guided the AI to implement modular component structures and streamlined deployment pipelines for optimal cross-device performance.
- Curated and integrated a comprehensive showcase of university projects where I acted as the creative lead, alongside self-initiated technical builds.

TheraNeck E-commerce Platform (Full-Stack Architecture & Market Validation)

Mar 2026 – May 2026

Independent Project – www.trytheraneck.com

- Directed the complete build of a conversion-focused React storefront, utilizing AI-assisted environments (Cursor, Claude Code) to rapidly iterate from concept to deployment.
- Designed the UX/UI and orchestrated the implementation of a strategic smoke-test funnel, integrating out-of-stock email captures to measure purchase intent.
- Managed the integration of Stripe payment infrastructure and Umami analytics to monitor real-time engagement and optimize the checkout experience.

Brand Activation & Community Engagement

Mar 2025 – Jul 2025

MOES Tuinen – Amstelveen, Netherlands

- Developed a localization marketing campaign targeting Dutch and international expat audiences.
- Created brand assets, grow kits, flyers, and digital content for a physical pop-up event.
- Conducted bilingual interviews and user testing to shape the final community activation strategy.

Amstelhof Connect App (UX/UI & Concept Design)	Dec 2024 – Mar 2025
<i>Amstelhof Sport & Health Club – Uithoorn, Netherlands</i>	
- Designed a high-fidelity Figma prototype for an internal staff coordination and member engagement mobile app. - Conducted user research, surveys, and stakeholder focus groups to design an AI-powered email assistance center, member profiles, and a task-tracking board. - Aligned design deliverables with GDPR requirements and ROI deployment estimations.	

PatronApp (Mobile App Prototype)	Mar 2023 – Jun 2023
<i>Patronaat (Music Venue) – Haarlem, Netherlands</i>	
- Designed an Adobe XD mobile app prototype focused on expanding international visitor inclusion. - Created user flows for event recommendations, community spaces, and multilingual concert details. - Iterated design details based on user testing, accessibility rules, and venue stakeholders.	

EARLY PROFESSIONAL EXPERIENCE

Software Tester Flavour x WarChild, Utrecht 2018 – 2019
Teacher Assistant Alkwin Kollege, Uithoorn 2017 – 2018
Interpreter & Translator Gemeente Amstelveen & VluchtelingenWerk 2014 – 2019

EDUCATION

Bachelor of Arts: International Creative Business (Minor in Digital Marketing)	Graduated 2025 (With Merit)
<i>Inholland University of Applied Sciences – Haarlem, Netherlands</i>	
Information Technology (BSc Programme - 2 Foundational Years Completed)	2018 – 2020
<i>Inholland University of Applied Sciences – Haarlem, Netherlands</i>	
Teacher of English Studies (BEd Programme - 1 Foundational Year Completed)	2017 – 2018
<i>Utrecht University of Applied Sciences – Utrecht, Netherlands</i>	

LANGUAGES & CERTIFICATIONS

Languages: English (Fluent, C1/C2), Dutch (Intermediate, B1), Arabic (Native).
Certifications: Google Analytics 4 Certificate, Google Fundamentals of Digital Marketing, IELTS Certificate, B1 Dutch Language Certificate.
