Introduction

During my internship at PPHE as a Digital Marketing: Web Development intern, I have embarked on a journey aimed at enhancing my skills and knowledge in the dynamic field of web development and digital marketing. As part of my studies in the Creative Business program at InHolland, this internship serves as a crucial opportunity to bridge theoretical learning with practical application in a professional setting.

The period covered in this report spans from the commencement of my internship on **12-02-2024** to the midpoint of the internship **11-04-2024**, approximately ten weeks into the program. Over this duration, I have actively engaged in various tasks and activities outlined in my learning goals and business processes, collaborating with cross-functional teams and contributing to the digital marketing endeavors of PPHE.

This report aims to provide insights into the business processes in which I have participated, detailing my activities, challenges encountered, outcomes achieved, and the extent to which I have progressed in achieving my personal objectives. Additionally, it reflects on the feedback received from my supervisor and colleagues, offering a comprehensive overview of my development during the initial phase of the internship.

In the appendix, I showcase screenshots of the work I have completed during the internship offering tangible evidence of my contributions (**Appendix A**), I include a systematic table of my daily tasks and activities providing a clear overview of my responsibilities throughout the internship period (**Appendix B**). Moreover, I present feedback received from my supervisor and colleagues (**Appendix C**). Together, these supplementary materials complement the narrative provided in this report.

Insights: Business Processes

In this section, I delve into the insights gained from my involvement in the various business processes outlined in my internship orientation. Specifically, I explore the activities and experiences related to Core Task 3: Marketing, encompassing Business Process 1: Digital Marketing, Business Process 2: Web Development, and I reflect on my personal development journey, as outlined in Core Task 7 (Personal Development). Through this exploration, I aim to provide a comprehensive overview of the knowledge, skills, and growth attained during the initial phase of my internship at PPHE.

Business Process 1: Digital Marketing (CT3)

In the realm of Digital Marketing, during the first half of the internship, I've been deeply involved in several key processes outlined in the orientation form (specifically in the processes in **bold**):

3.1 - Implementing data-driven marketing strategies by optimizing websites for technical SEO, UX, and conversion optimization:

- Conduct technical SEO audits and implement improvements on hotel websites to enhance search engine visibility and ranking.
- **Optimize user experience (UX) by addressing bugs, glitches, and missing content on WordPress websites, ensuring a seamless browsing experience for visitors.**
- Utilize Google Analytics, Google Search Console, and Google Tag Manager to gather and analyze website data for informed decision-making in digital marketing strategies.
- **Participate in A/B testing projects to test different versions of interfaces and digital experiences, such as modifying pricing placement on booking panels to increase reservations.**

3.2 - Collaborating on digital marketing projects to enhance brand visibility and engagement:

- **Collaborate with the branding team to design interface changes on Figma, ensuring consistency with brand identity and improving user engagement.**
- **Work closely with the content team to create and update website content on WordPress, Squarespace, or Wix platforms, maintaining brand messaging and relevance.**
- **Engage in A/B testing projects to gather data and optimize digital marketing campaigns for effective brand interaction and engagement.**

3.3 - Utilizing Tools for Website Optimization: Use GTmetrix to monitor website performance and address issues causing lagging, ensuring fast and smooth website operation.

Process: Optimize user experience (UX) by addressing bugs, glitches, and missing content on WordPress websites, ensuring a seamless browsing experience for visitors.

During my the first half of my internship at PPHE, a significant portion of my role involved optimizing user experience (UX) on WordPress websites by addressing bugs, glitches, and missing content. This process was crucial in ensuring a seamless browsing experience for visitors to the websites. To accomplish this, I diligently scanned the websites for any technical and visual issues that could potentially hinder user experience (**Check Appendix A: 6. Fixing WordPress Website Issues**)

Upon identifying areas for improvement, I employed a range of strategies to address these issues effectively. This included utilizing tools such as browser inspection tools and CMS dashboards to delve into the underlying causes of glitches and inconsistencies. By leveraging these resources, I gained deeper insights into the technical intricacies of the websites, enabling me to diagnose and resolve issues promptly.

I collaborated closely with colleagues across different teams to streamline the process of addressing UX-related concerns. Clear communication and collaboration were essential in ensuring that all stakeholders were aligned in their efforts to optimize website performance and user satisfaction. By fostering a collaborative environment, we were able to pool our expertise and resources to tackle UX challenges more efficiently.

In summary, my role in optimizing UX on WordPress websites during the first half of my internship at PPHE was multifaceted and demanding. It required a combination of technical proficiency, attention to detail, and effective collaboration to deliver tangible improvements to the browsing experience of website visitors. Through this process, I gained valuable insights into the complexities of website management and the importance of prioritizing user-centric design principles.

Learning and Insights

- **Technical Troubleshooting:** My ability to identify the root causes of UX issues improved through experience. I gained familiarity with browser inspection tools and the WordPress dashboard to pinpoint technical problems and implement appropriate solutions.
- **The Interplay of Technologies:** WordPress website UX depends on the seamless interaction between various technologies like plugins, themes, and custom code. Compatibility issues or outdated components can often lead to unexpected errors, requiring careful diagnosis and updates (WordPress, 2024).
- **Empathy for the User:** My perception of websites evolved from a developer's view to one centered on the end-user. I now prioritize identifying and resolving issues that directly impact the browsing experience and potential customer actions (Lainsbury, 2022).

Process: Participate in A/B testing projects to test different versions of interfaces and digital experiences, such as modifying pricing placement on booking panels to increase reservations.

During the first half of my internship at PPHE, I actively participated in A/B testing projects aimed at improving various aspects of interfaces and digital experiences across PPHE's websites. One notable instance of this involvement was during meetings with the IT company eClrex, where we delved into the intricacies of A/B testing methodologies and implementation. In these meetings, I engaged in ideation sessions where we brainstormed different ideas for A/B tests to optimize user engagement and conversion rates on various PPHE websites. Drawing upon my knowledge of web development principles and design concepts, I contributed ideas for potential variations to be tested.

One specific project I worked on involved creating prototypes for the booking panel interface on the art'otel website (**Check Appendix A: 1. Prototypes Design - 1.1 Booking Panel Prototype**). After conducting thorough research and analysis, I developed a prototype aimed at enhancing the user experience during the booking process. This prototype underwent rigorous testing through A/B experiments to determine its effectiveness in driving reservations.

I collaborated closely with the branding team to gather feedback on the prototypes created for various interface enhancements. After developing the initial prototypes, I proactively engaged with the branding team to ensure alignment with PPHE's brand identity and messaging.

During these collaborative sessions, I presented the prototypes and discussed the proposed changes in detail, seeking input and feedback from branding experts. Their valuable insights helped refine the prototypes to better reflect PPHE's brand values and maintain consistency across digital experiences.

Following the testing and refinement phase, the results indicated that maintaining a fixed booking panel on the screen led to improved user engagement and conversion rates. As a result, we decided to implement this design change, leveraging the insights gained from the A/B testing process.

By actively participating in A/B testing projects and contributing to the creation of prototypes, I gained valuable hands-on experience in optimizing digital experiences to meet user needs and business objectives. This experience further honed my skills in interface design and conversion optimization, equipping me with practical insights into effective web development strategies.

Learning and Insights

- **Beyond Aesthetics:** Data informed my understanding that design isn't just about visual appeal, but about measurable results like increased engagement and conversions (Hyde, 2023).
- **The Power of Experimentation:** Real-world A/B testing taught me the impact of seemingly minor design changes. It highlighted how data, not just intuition, can guide the best user experience (Torabi, 2024).
- **Teamwork in Action:** Working with stakeholders like eClrex and the branding team reinforced the importance of diverse perspectives in the design process.

Processes: Collaborating on digital marketing projects to enhance brand visibility and engagement:

- **Collaborate with the branding team to design interface changes on Figma, ensuring consistency with brand identity and improving user engagement.**
- **Work closely with the content team to create and update website content on WordPress, Squarespace, or Wix platforms, maintaining brand messaging and relevance.**

Through my active participation in collaborating on digital marketing projects, I gained valuable insights into enhancing brand visibility and engagement. Working hand in hand with the branding team, I contributed to designing interface changes on Figma with a focus on ensuring consistency with PPHE's brand identity while also striving to improve user engagement (**Check Appendix A: 1. Prototypes Design**) This process involved meticulous attention to detail and a deep understanding of brand guidelines to ensure that all proposed design modifications aligned seamlessly with the overarching brand image.

Additionally, my close collaboration with the content team provided me with valuable insights into maintaining brand messaging and relevance across various platforms, including WordPress, Squarespace (**Check Appendix A: 5. Website Design & Creation**). By working closely with content creators, I learned the importance of crafting compelling and cohesive website content that not only resonates with the target audience but also reinforces the brand's messaging and values. This process required effective communication and coordination to ensure that all content updates accurately reflected the brand's voice and maintained relevance in the ever-evolving digital landscape.

Process: Utilizing Tools for Website Optimization: Use GTmetrix to monitor website performance and address issues causing lagging, ensuring fast and smooth website operation.

I took charge of the GTmetrix task, which involved maintaining up-to-date reports and analyzing website performance to identify areas for improvement.

Using GTmetrix (2024), I regularly generated reports to assess the performance of PPHE websites, meticulously examining various metrics such as page load times, page size, and requests. These reports provided valuable insights into the current state of website performance and highlighted areas that required attention. Analyzing the GTmetrix reports, I scrutinized the data to pinpoint specific areas where improvements could be made. This involved identifying factors contributing to slower loading times or suboptimal user experiences, such as large image files, inefficient coding, or excessive HTTP requests. Based on my analysis, I then proceeded to open tickets on Asana, outlining actionable steps to address the identified issues and improve website performance. These tickets detailed specific tasks and action items to be undertaken, assigning responsibilities to relevant team members and setting deadlines for completion.

Business Process 2: Web Development (CT3)

In the section, I lay out insights into Business Process 2: Web Development—an integral aspect of my internship journey at PPHE. The textbox below highlights the key processes I engaged with during the first half of my internship, represented in **bold**. While not every task will be extensively discussed here, as many intersect with processes outlined in Business Process 1: Digital Marketing, the previous section provides comprehensive coverage. This section delves deeper into the specific nuances of web development tasks undertaken and the invaluable lessons gleaned from these experiences.

3.1 - Actively contributing to web design and development aligns with designing long-term marketing strategies for improved online presence:

- **Scan and update cookie lists for each hotel website to ensure compliance with privacy regulations, updating the cookie banner to display current information for user acceptance.**
- **Identify and address missing translations on various PPHE websites, ensuring accurate and consistent content across multiple language options, which aligns with designing long-term marketing strategies for international audiences.**

3.2 - Enhancing landing pages and participating in creative projects contributes to the development of an integrated marketing communication program:

- **Help with interface design and experience design (UX/UI) issues on Figma, collaborating with the branding team to design changes that enhance user engagement and align with marketing communication strategies.**
- **Participate in A/B testing projects, such as modifying pricing placement on booking panels, to increase reservations and contribute to an integrated marketing communication program aimed at improving conversion rates and customer engagement.**

3.3 - Collaborating on the implementation of features within web projects, promoting audience interaction:

- **Work on the development of hotel and restaurant websites from scratch to the maintenance phase, collaborating with various teams within the company, such as branding, content, and paid media, to ensure the integration of social media features that promote audience interaction.**
- **Utilize tools like Google Analytics, Google Search Console, and Google Tag Manager to gather and analyze website data, informing decisions on the implementation of social media features and other web projects aimed at enhancing user engagement and online presence.**

Process: Scan and update cookie lists for each hotel website to ensure compliance with privacy regulations, updating the cookie banner to display current information for user acceptance.

During the first half of my internship at PPHE, I played a crucial role in the cookie compliance project, driven by emerging laws such as GDPR (2024) and Google Consent Mode v2 (2024). My task involved ensuring that all PPHE websites complied with the latest regulations regarding cookie usage and user consent (**Check Appendix A: 3. Cookies Compliance Project**).

To achieve this, I utilized advanced tools such as cookie scanners such as Cookieserve (2024) and Chrome inspection to meticulously analyze and identify all cookies being utilized across PPHE websites. This involved conducting comprehensive audits to ascertain the types of cookies being used, their purposes, and their impact on user privacy. Once the cookies were identified, my next step was to update the cookie tables, ensuring that they accurately reflected the information about each cookie, including its name, purpose, and duration. I meticulously updated these tables to provide users with transparent and easily accessible information about the cookies being used on the website.

Furthermore, I focused on updating the cookie banners that appeared on the PPHE websites, enhancing their look, feel, and user experience. This involved redesigning the cookie banners to align with the brand identity and provide users with clear and concise information about cookie usage. I ensured that the banners were prominently displayed and easily navigable, allowing users to make informed decisions about their consent preferences.

Through my participation in the cookie compliance project, I not only ensured that PPHE websites remained compliant with the latest regulations but also contributed to enhancing user trust and transparency. This experience provided me with valuable insights into data privacy regulations and equipped me with practical skills in web development and compliance management.

I collaborated closely with the development team to implement necessary fixes and updates. This collaborative approach enabled us to address UX-related issues effectively and promptly, enhancing the overall quality of the websites.

Learning and Insights

- **The Complexity of Data Privacy:** I gained a firsthand understanding of the intricacies of data privacy regulations like GDPR and Google Consent Mode. This knowledge will be valuable in my future web development roles (Tytunovich, 2024).
- **Balancing User Rights and Functionality:** Website compliance isn't just about following rules. It involves finding a balance between respecting user privacy and maintaining the website's necessary functionality and tracking capabilities (Levy, 2023).
- **User-Centric Design:** Designing clear and informative cookie banners taught me how to translate complex technical concepts into user-friendly language, empowering website visitors to make informed choices (Juviler, 2023).

Process: Identify and address missing translations on various PPHE websites, ensuring accurate and consistent content across multiple language options, which aligns with designing long-term marketing strategies for international audiences.

During the initial phase of my internship at PPHE, a significant aspect of my role involved ensuring the accuracy and consistency of multilingual content across various PPHE websites. This process was integral to aligning with long-term marketing strategies aimed at catering to diverse international audiences (**Check Appendix A: 2. Website Language Translation: Italian**).

My primary responsibility revolved around identifying and addressing missing translations on multiple PPHE websites. This encompassed a thorough examination of various elements, including permalinks, content, taxonomy, mixed media, string translation, amenities, and rooms. By meticulously reviewing each aspect of the websites, I aimed to guarantee that all content was accurately translated into the respective languages, thereby enhancing accessibility and user experience for non-English-speaking visitors.

To execute this task effectively, I adopted a systematic approach that involved collaborating closely with content creators, translators, and web developers. Through clear communication and coordination, we streamlined the process of translating and updating content across various language options. Additionally, I leveraged translation management tools and content management systems to facilitate the localization process and ensure consistency across all platforms.

Learning and Insights

- **Cultural Sensitivity:** Working on multilingual content emphasized the importance of cultural sensitivity in global marketing endeavors. I learned to navigate cultural nuances and tailor content to resonate with diverse audiences, thereby fostering stronger connections and engagement (Novik, 2023).
- **Attention to Detail:** The meticulous nature of reviewing and updating translations honed my attention to detail. I developed a keen eye for identifying inconsistencies and discrepancies, ensuring that each piece of content accurately reflected the intended message across different languages.
- **Collaboration and Communication:** Collaborating with various stakeholders, including content creators, translators, and web developers, underscored the significance of effective communication and teamwork. I learned to articulate requirements clearly, listen actively to feedback, and collaborate seamlessly to achieve common objectives.
- **Global Perspective:** Engaging with multilingual content broadened my perspective on global marketing strategies. I gained a deeper understanding of the diverse preferences and expectations of international audiences, which informed strategic decisions aimed at enhancing brand resonance and expanding market presence.

Business Process 3: Personal Development (CT7)

After having reflected on Business Process 1 & 2, in this section I reflect on my development in Core Task 7 (Personal Development), focusing on enhancing collaboration skills and proactive problem-solving. Through this exploration, I aim to provide a comprehensive overview of the knowledge, skills, and growth attained during the initial phase of my internship at PPHE. In the textbox below I've **bolded** the processes where I took the most active role during the first half of my internship

7.1 - Maintaining a professional attitude, demonstrating continuous development:

- **Demonstrate a professional attitude while collaborating with various teams within the company, including branding, content, and paid media teams.**
- **Engage in continuous learning and development by participating in daily SCRUM meetings and weekly meetings with supervisors, reflecting on daily activities and seeking feedback for improvement.**
- **Maintain journals of daily activities during the internship to track progress and reflect on personal and professional growth.**

7.2 - **Effective collaboration with team members and stakeholders: Collaborate effectively with team members and stakeholders, such as the branding team, content team, and paid media team, to align digital marketing projects with organizational goals and objectives.**

7.3 - **Proactively solving problems, acting with a view to achieving solutions**

7.4 - **Demonstrating leadership through initiative and guidance: Lead by example in maintaining project management tools like Asana, ensuring tasks are completed on time and providing guidance to team members when needed.**

Processes:

- **Demonstrate a professional attitude while collaborating with various teams within the company, including branding, content, and paid media teams.**
- **Engage in continuous learning and development by participating in daily SCRUM meetings and weekly meetings with supervisors, reflecting on daily activities and seeking feedback for improvement.**
- **Maintain journals of daily activities during the internship to track progress and reflect on personal and professional growth.**

The first half of my internship at PPHE emphasized the importance of professionalism, continuous learning, and self-reflection within a collaborative environment.

- **Developing a Professional Attitude:** Collaborating with diverse teams like branding, content, and paid media has been invaluable. I've learned to adapt my communication style to different stakeholders, clearly convey technical information to non-technical colleagues, and actively listen to feedback to ensure projects stay aligned with both marketing goals and brand identity.
- **Continuous Learning through SCRUM and Supervision:** Daily SCRUM meetings provided a structured forum for reporting progress, identifying obstacles, and fostering a solution-oriented team mindset. Weekly meetings with my supervisors were crucial for receiving in-depth feedback, refining my technical skills, and gaining insights into the wider context of my work.
- **The Power of Journaling:** Maintaining daily journals has been transformative. Documenting my activities, challenges, and successes not only tracks my progress but also forces me to reflect critically on my work. This practice helps me identify strengths, areas for improvement, and patterns in my problem-solving approach.

Key Takeaways

Through engaging in these processes, I've come to understand that:

- **Professionalism is a Skill:** Clear communication, respect for colleagues' time, and a willingness to take ownership are not just personality traits but skills to be honed continually.
- **Feedback is Fuel:** Proactively seeking and incorporating feedback from supervisors and colleagues has accelerated my growth more than any self-directed study alone.
- **Reflection Drives Progress:** Taking the time to analyze my experiences, both positive and challenging, is the key to turning daily tasks into meaningful professional development.

Future Application

Moving forward, I plan to:

- **Seek More Cross-Team Collaboration:** Actively look for opportunities to work with other departments to gain a broader understanding of PPHE's operations.
- **Ask Better Questions:** Go beyond seeking feedback on completed tasks and ask more strategic questions during meetings to gain a deeper knowledge of decision-making processes.
- **Refine My Journaling:** Incorporating prompts or frameworks into my journaling to stimulate deeper reflection and identify actionable insights for improvement.

Processes:

- **Effective collaboration with team members and stakeholders: Collaborate effectively with team members and stakeholders, such as the branding team, content team, and paid media team, to align digital marketing projects with organizational goals and objectives.**
- **Proactively solving problems, acting with a view to achieving solutions**

My focus on effective collaboration and proactive problem-solving has been instrumental in navigating the dynamic landscape of digital marketing at PPHE.

- **The Power of Collaboration:** Working closely with the branding, content, and paid media teams has shattered any preconceived notions I had about working in silos. Successful digital marketing campaigns hinge on the alignment of expertise and a shared understanding of the project's objectives. I've seen firsthand how open communication and a willingness to compromise leads to stronger outcomes for everyone involved.
- **Problem-Solving as a Mindset:** The internship has shifted my approach from merely fixing website issues to proactively identifying potential problems and proposing solutions before they escalate. This involves thorough testing, thinking from the user's perspective, and anticipating where friction might occur. It also means not being afraid to ask questions or challenge assumptions to ensure we're addressing the root cause, not just the symptom.

Key Takeaways

- **Teams are Multipliers:** Diverse perspectives and skill sets working in tandem can generate solutions far more creative and effective than any single person could produce.
- **No Problem is Too Small:** Even minor technical glitches or inconsistencies can negatively impact the user experience and overall project success.
- **Communication is Paramount:** Proactive problem-solving relies on clear, timely communication with stakeholders to ensure everyone is informed and potential roadblocks can be addressed collaboratively.

Future Application

Moving forward, I aim to:

- **Take More Initiative:** Lead discussions with teams to identify potential areas for improvement or streamline processes, moving from problem solver to solution driver.
- **Document Insights:** Maintain a log of recurring issues and the solutions we implemented. This could become a valuable resource to prevent future problems or onboard new team members.
- **Hone Explanation Skills:** Continue practicing translating technical concepts or solutions into clear, actionable language for non-technical colleagues.

Reflections: Challenges & Solutions

In this chapter, Using the STARRT reflection model, I reflect on challenges and solutions that took place during the first half of my internship at PPHE.

Learning to Navigate a Dynamic Environment

S (Situation) Upon starting my internship at PPHE, I felt overwhelmed by the company's vast operations, numerous ongoing projects, and the sheer volume of new information I needed to learn. It was difficult to identify my place and how to best contribute.

T (Task) My primary task was to quickly adapt to PPHE's dynamic environment, find my footing within the team, and become a valuable contributor.

A (Action) I implemented several proactive strategies to navigate this challenge:

- **Organized Learning:** I meticulously took notes during meetings and training sessions, helping me structure the influx of information and pinpointing areas where I needed to focus.
- **Independent Research:** Seeking out online courses and tutorials allowed me to supplement my knowledge in essential areas of marketing and web development.
- **Open Communication:** I actively engaged with my colleagues, asking questions to both clarify technical processes and gain a broader understanding of PPHE's overall structure and workflows.

R (Results) These strategies had a significant positive impact:

- **Increased Confidence:** My proactive learning helped me gain a clearer understanding of my role and responsibilities, boosting my confidence in my ability to contribute.
- **Stronger Integration:** My willingness to ask questions built trust with colleagues, fostering a sense of belonging and accelerating my integration into the team.
- **Recognition:** The quality of my work received positive feedback, validating my adaptation efforts and motivating me to strive for further growth.

R (Reflection) While these strategies were effective, in similar situations, I'd also consider:

- **Seeking a Mentor:** A designated mentor could provide a structured onboarding plan and regular check-ins to offer guidance and a sounding board for questions.
- **Process Mapping:** If possible, creating visual diagrams of company processes and inter-team workflows could facilitate understanding of the big picture.

T (Transfer) This experience solidified the importance of:

- **Continuous Learning Mindset:** Recognizing that adaptation is an ongoing process in any complex work environment.
- **Leveraging Resources:** Proactively utilizing both internal knowledge networks (colleagues) and external resources to enhance my understanding.

Cookie Compliance Project

S (Situation) During the cookie compliance project, I faced the challenge of a large, tedious data entry task. This involved filling in extensive tables with detailed cookie information for PPHE websites.

T (Task) My responsibility was to ensure the accuracy and completeness of this data, which was crucial for achieving compliance with privacy regulations. The sheer volume of information and repetitive nature of the task presented a significant obstacle to my motivation and productivity.

A (Action) To overcome this, I implemented the following strategies:

- **Breaking it Down:** I divided the large task into smaller, manageable chunks across several days. This prevented me from feeling overwhelmed and allowed for greater focus.
- **Interspersing Tasks:** I intentionally scheduled other, more engaging tasks throughout the day. This provided mental breaks and a sense of variety, combating the feeling of being "robotic."

R (Result) My approach significantly improved both my productivity and my overall experience with the task:

- **Increased Efficiency:** Working in focused sessions with breaks enabled me to maintain accuracy and attention to detail.
- **Improved Morale:** Avoiding prolonged stretches of monotonous work helped prevent burnout and maintained my motivation towards project completion.

R (Reflection) While my strategy was successful, in a similar situation I would also:

- **Explore Automation:** I'd investigate if any tools or scripts could automate some of the data entry, freeing up time for more engaging tasks.
- **Seek Collaboration:** I'd see if any portion of the task could be shared with a colleague to break up the monotony.

T (Transfer) This experience taught me the importance of:

- **Self-Awareness:** Recognizing when a task is impacting my productivity and morale, and then proactively seeking solutions.
- **Time Management:** Breaking down large tasks and scheduling for variety are skills applicable to many future projects, whether data-driven or more creative.

The Power of Initiative and Building Connections

S (Situation) As a new intern at PPHE, I faced the challenge of integrating into a fast-paced company with a complex structure and established workflows.

T (Task) My task was not just to learn technical skills, but to become a collaborative and contributing member of the team, earning the trust and respect of my colleagues.

A (Action) I approached this with a multi-faceted strategy:

- Proactive Learning: I consistently demonstrated initiative by seeking knowledge (notes, online resources, asking questions) to fill in gaps in my understanding.
- Focus on Quality: I dedicated myself to producing high-quality work, demonstrating my commitment and ability to meet PPHE's standards.
- Relationship Building: I invested in getting to know my colleagues, showing genuine interest in their work, and seeking their guidance when needed.

R (Results) These efforts yielded significant positive results:

- Rapid Adaptation: I quickly gained a solid grasp of company processes, enabling me to work more independently and confidently on projects.
- Positive Feedback: The quality of my work was recognized by both my supervisor and team members, boosting my morale and reaffirming my efforts.
- Sense of Belonging: Building positive relationships with colleagues fostered a sense of camaraderie and established me as a valuable team player.

R (Reflection) This experience reinforced several key lessons for me:

- Initiative Pays Off: Taking ownership of my learning accelerated my integration and made me more effective sooner.
- Quality Builds Trust: Demonstrating competence builds colleagues' confidence in your abilities, opening doors to more responsibility.
- Relationships Matter: In a collaborative environment, investing in positive work relationships fosters smoother communication and a sense of shared purpose.

T (Transfer) These lessons will guide me in future endeavors:

- Proactive Onboarding: I'll apply the same principles of proactive learning and relationship building when starting any new role.
- Focus on Impact: I'll prioritize delivering quality work that not only meets but exceeds expectations within any team setting.

Conclusion and Action Plan

The first half of my internship at PPHE was a transformative journey of growth and adaptation. Navigating the initial complexity of PPHE's operations pushed me to develop proactive learning strategies and build strong relationships with colleagues. Successfully addressing website issues, participating in A/B testing projects, and contributing to the cookie compliance initiative solidified my technical skills in web development and data privacy practices. These experiences have not only made me a more capable digital marketer but also a more adaptable, self-reliant professional. I intend to carry this proactive, collaborative mindset forward as I complete my internship and embark on my career. I'm deeply grateful to PPHE, my supervisor Astrid, the guidance of my placement coach Harriet at InHolland, and the entire team for their support and the opportunity to learn within such a dynamic and impactful organization.

Action Plan: Second Half of Internship at PPHE

Overall Goal: Leverage the skills and knowledge gained in the first half of my internship to contribute meaningfully to PPHE's digital marketing efforts across various projects and work on business processes that I didn't get to work on during the first half.

Specific Objectives:

1. SEO Optimization and Website Performance:

- Conduct a comprehensive technical SEO audit of at least 5 hotel websites using tools like Mangools SEO Tool (2024).
- Track website performance metrics (e.g., organic search traffic, rankings) using Google Search Console and analyze the impact of implemented changes.

2. Data-Driven Decision Making: Learn Google Analytics, Google Search Console, and Google Tag Manager to gather and analyze website data.

3. Website Development and Cross-Team Collaboration:

- Participate in the entire website development lifecycle (from scratch to maintenance) for The Brush restaurant.
- Actively collaborate with branding, content, and paid media teams to ensure seamless integration of social media features promoting audience interaction and perhaps do cross-training for a day.

4. Project Management and Team Leadership:

- Champion the use of project management tools like Asana by diligently maintaining task lists and deadlines.
- Proactively identify and address potential roadblocks in assigned projects, leading by example with excellent time management and organizational skills.
- Offer support and guidance to team members when needed, fostering a collaborative and efficient work environment.

Appendix A: Work Showcase

1. Prototypes Design

This task involved collaborating with cross-functional teams to identify areas for enhancement or innovation, gathering requirements, and translating them into tangible prototypes. Using tools like Figma and other prototyping software, I conceptualized and designed interface changes, user flows, and interactive elements to improve the overall user experience.

2. Website Language Translation: Italian

I undertook the task of implementing the translation of the Italian language on the art'otel Amsterdam website. This involved ensuring that the website's content was accurately translated into Italian to cater to a wider audience and enhance user experience for Italian-speaking visitors.

3. Cookies Compliance Project

I played a crucial role in the cookie compliance project, driven by emerging laws such as GDPR and Google Consent Mode v2. My task involved ensuring that all PPHE websites complied with the latest regulations regarding cookie usage and user consent.

To achieve this, I utilized advanced tools such as cookie scanners and Chrome inspection to meticulously analyze and identify all cookies being utilized across PPHE websites. This involved conducting comprehensive audits to ascertain the types of cookies being used, their purposes, and their impact on user privacy.

4. GTMetrix Analysis

GTMetrix is a website for analyzing websites performance. I took charge of the GTMetrix related tasks, which involved maintaining up-to-date reports and analyzing website performance to identify areas for improvement...etc.

5. Website Design & Creation

I undertook the task of creating a temporary website on Squarespace for PPHE's new restaurant and bar: The Brush. The objective of this project was to establish an online presence for The Brush before its official launch, providing potential customers with a sneak peek of what to expect and generating excitement around the upcoming opening.

6. Fixing WordPress Website Issues

I frequently addressed issues on the WordPress CMS platform to enhance user experience. Often, I was approached by colleagues from different teams who required assistance with various tasks on the CMS. This included granting access to specific websites, resolving technical glitches, and updating content to ensure consistency and relevance.

Appendix B: Daily Activities Log

Date	Activities & Tasks	Meetings/Events Attended
12/02/2024	- Daily standup SCRUM meeting - A small introduction to the team, company...etc. - Getting to know various terms (jargon) about the company - Weekly Ignite Board Review	• Dig Marketing Daily Standup • Weekly Ignite Board Review

Appendix C: Feedback

In the Feedback section of the appendix, I showcase two onboarding reviews conducted during my internship at PPHE. These reviews took place in week 3 and week 6 with my internship supervisor and provided valuable opportunities to discuss my progress, performance, and areas for improvement.

Note: OA = Omar Abdulghani (student), AC: Astrid Contreras (internship supervisor)

HOTEL GROUP

TEAM MEMBER End of Probationary Period Review - NL – Week 3

Week 3 TEAM MEMBER End of Probationary Period Review - NL

Name:	Omar Abdulghani	Job Title:	Digital Marketing - Web Development Intern
Department:	Digital Marketing – Web Development	Start Date:	12-02-2024
Line Manager Name:	Astrid Contreras	Line Mgr. Job Title:	Digital Marketing - Web Development Manager
Date of Review:	06-03-2024	Completed via Form or Learn & Grow	

SECTION A: Check in

1. How confident are you in your role now?

Team Member:

I'm feeling increasingly confident the role, and I'm eager to keep on learning about various ongoing/future projects in regard to web development but also other departments.

2. Has this job matched your initial expectations?

Team Member:

Yes, my initial expectations about the role have been met.

3. What stage are you at on your induction training plan?

Team Member:

I have completed all of Learn & Grow courses, and followed one onboarding training, the second one I will be doing next month. Now I'm at stage where I will be writing an organizational report for the company my studies which will help me with getting even more familiar with the company.

4. What successes or challenges (if any) have you come across so far?

Team Member:

Successes: I'm managing to do the tasks I've been given successfully. I aim to finish fast while paying attention to detail. For example, the Cookie Banner Updates project, creating prototypes for art'otel where I learned to use Figma in a short time and creating a website for The Brush on Squarespace.

Challenges: Not so much familiarity with ongoing projects, to work on this I am keeping notes of either terms or questions that I have in my journal which I will later ask my supervisor about or research.

5. Do you feel part of the team, following completion of 3 weeks in your role?

Team Member:

I do. I feel part of the team.

6. How can I help you reach your personal goals for this job?

Team Member:

One on one weekly meetings would be very helpful to keep up with each other and where I can ask some questions I have and get to know each other more.
Giving me with tasks that are in line with my personal goals.
Providing me with feedback every now and then so I know what I'm doing well and what I need to improve on.

7. Have you had any disagreements that you would like to discuss?

Team Member:

No disagreements so far.

Manager comments:

Overall, you're doing well. You are quick to finish tasks and take initiative in learning something new. I'll make sure to give you a better context of all of the work happening in a project including work that is being done by different departments. You will also be included in pretty much all projects within the coming 6 months.

Make sure to continue tracking and adding your work into Asana. Reach out to me for anything to do with school / work questions or guidance. Continue asking as many questions as you can, you're not bothering anyone.

SECTION B: Competencies

COMPETENCY PERFORMANCE

Our PPHE Hotel Group competencies (detailed in our Competency Guide) introduced at the We Are Creators session, include all the related knowledge, skills, abilities, and attributes that form a person's job. The following competencies are in line with our business strategies and our expectations for the effective performance of everyone within PPHE Hotel Group.

When reflecting on your performance levels, please give details and reasons why you have scored yourself Growing, Achieving, Exceeding, and Outstanding.

PROACTIVE

Pro-actively looks for ways to solve issues, seeks out new ideas to improve service delivery and reaches out to guests and team members, making everyone feel welcome.

*Performance Level**

Growing

** input the descriptive term that reflects performance*

Team Member/Manager Comments

OA: I aim to solve issues and new bring in new ideas in tasks assigned to me

AC: I agree and that is the way to go within our team. We have the freedom to do this and encourage this so keep it going.

Action Points

OA: I'm still growing on this as it's my third week working in this role.

AC: Start writing down or communicating openly any changes that you would like to make in terms of way of working, websites that you are reviewing or working on or any other task.

ENGAGE

Demonstrates passion for hospitality and for the organisation, department, team, team members and guests by engaging consistently with positive energy in all situations.

Performance Level*

Achieving

* input the descriptive term that reflects performance

Team Member/Manager Comments

OA: I aim to always engage positively with fellow team members.

AC: Overall agree with you.

Action Points

OA: According to experiences I have had so far with other team members, everything went positively.

AC: No real actions, just keep it like this. Maybe start engaging and reaching out to teams outside of our own

FLEXIBLE

Consistently recognises needs from guests and team members, adapts and stretches themselves to meet challenges and changes ways of working flexibly to make others feel valued.

Performance Level*

Achieving

* input the descriptive term that reflects performance

Team Member/Manager Comments

OA: I aim to adapt and meet challenges and ways of working flexibly to make others feel valued.

AC: You are doing this well, I like that you always ask what is priority whenever something new is given to you.

Action Points

OA: I'm still growing on this as it's my third week working in this role.

AC: No actions so far, you will get comfortable with time.

CREATE

Actively strives to deliver inspirational service and create unique experiences that exceed expectations and positively surprise guests and team members.

Performance Level*

Exceeding

* input the descriptive term that reflects performance

Team Member/Manager Comments

OA: I aim to exceed expectations and positively surprise team members.

AC: You're doing really well. You create high quality work and do it at quick pace which is really good.

Action Points

OA: I'm still growing on this as it's my third week working in this role.

AC: No real actions so far, keep doing what you're doing here.

TEAMWORK

Makes a consistent effort to connect with team members by building relationships, adapting their communication style appropriately and actively participating in team work to realise common goals.

Performance Level*

Achieving

* input the descriptive term that reflects performance

Team Member/Manager Comments

OA: I have managed to build relationships with some fellow team members, and I aim to grow more and build more relationships.

AC: I see this too, and it will keep growing the more projects and work you will be doing which put you into contact with different team members within and outside of our department

Action Points

OA: I've achieved this but also growing.

AC: You will keep growing as the time passes.

TECHNICAL SKILLS AND KNOWLEDGE

Skills are sufficient to produce a consistently high quality of work and knowledge is sufficient to deliver to requirements and to proactively solve simple problems.

Performance Level*

Growing

* input the descriptive term that reflects performance

Team Member/Manager Comments

Action Points

OA: I believe I produced high quality work meeting requirements and aiming to proactively solve problems.

AC: You are picking it up very quickly which is a great thing. Especially with Figma and Squarespace.

OA: I've achieved this but also growing.

AC: You're doing well with tools that are you in your comfort zone. Now the focus can also be on tools such as GA, GTM, GTMetrix, etc. that are focusing on the more technical or analytical side of the website work.

2. Onboarding Review Week 6:

4.07c).

TEAM MEMBER Onboarding Review - NL – Week 6

Week 6 TEAM MEMBER Onboarding Review - NL

Name:	Omar Abdulghani	Job Title:	Digital Marketing, Web Dev Intern
Department:	Digital Marketing – Web Development	Start Date:	12-02-2024
Line Manager Name:	Astrid Contreras	Line Mgr. Job Title:	Digital Marketing, Web Dev Manager
Date of Review:	25-03-2024	Completed via Form or Learn & Grow	

SECTION A: Check in

1. What are you most enjoying about your work?

Team Member:

I'm enjoying the variety of tasks I'm working on. I find the most satisfaction in tackling tasks/projects that require problem-solving and creativity. These challenging tasks allow me to learn and grow the most. Additionally, the supportive team environment is fantastic. Everyone's been incredibly helpful, and I feel comfortable asking questions whenever I need clarification or guidance.

2. What is it that you still need to learn/demonstrate?

Team Member:

I'm eager to expand my knowledge of Google's analytics platforms, particularly Google Analytics and Google Tag Manager. I'm interested in learning more about Adobe Analytics and Hotjar to broaden my skillset in web analytics in general.

3. Apart from the behavioural competencies, what have you learnt so far about your job or the company?

Team Member:

I've learned that PPHE has a very supportive team environment. I also learned a lot about the company by making the organization context report.

4. Have you identified anything that we could change, to make the job easier i.e a process or procedure?

Team Member:

While I haven't identified any specific areas for process changes, I'm eager to take on more challenging tasks that allow me to utilize and further develop my skills.

5. How have you improved your competency performance levels in your role since your 3rd week review?

Team Member:

I'm now learning about using GTmetrix to analyze website performance. By creating the organization context report, I gained a deeper understanding of PPHE's structure and goals. By adding in translations for an art'otel website, I gained understanding of the process involved in website translation for WordPress.

Manager / Team member comments:

We can definitely start introducing more technical tasks and projects which will help you understand things like analytics, tag managers, server, html / css code more. Especially how we do it in our company. While also keeping the creative work of course.

SECTION B: Competencies

COMPETENCIES

We have looked at the competencies over the last few weeks, and you rated yourself against them in week 3. Start to think where you would like your rating to be in week 10 and familiarize yourself more with the indicators in the 'Competency Booklet' in the link below:

you:niverse: <https://youniverse.pphe.com/Interact/Pages/Content/Document.aspx?id=22374>

PROACTIVE

Pro-actively looks for ways to solve issues, seeks out new ideas to improve service delivery and reaches out to guests and team members, making everyone feel welcome.

ENGAGE

Demonstrates passion for hospitality and for the organisation, department, team, team members and guests by engaging consistently with positive energy in all situations.

FLEXIBLE

Consistently recognises needs from guests and team members, adapts and stretches themselves to meet challenges and changes ways of working flexibly to make others feel valued.

CREATE

Actively strives to deliver inspirational service and create unique experiences that exceed expectations and positively surprise guests and team members.

TEAMWORK

Makes a consistent effort to connect with team members by building relationships, adapting their communication style appropriately and actively participating in team work to realise common goals.

TECHNICAL SKILLS AND KNOWLEDGE

Skills are sufficient to produce a consistently high quality of work and knowledge is sufficient to deliver to requirements and to proactively solve simple problems.

SECTION C: Training Plan

Department/Role Training Plan:

How are you doing against your role training plan and outline some things below you still need to cover:

- Redesigning / improving different pages on standalone websites using Figma
- A/B test the designs that are created to test the performance
- Use analytical skills to analyse data from the A/B test and decide whether development is needed post A/B test

Date of next meeting / review: (i.e. to discuss progress and set objectives)

If possible, motivate or elaborate on your choices above in a short, explanatory paragraph

Omar is talented in terms of prototyping, which brings a lot of value to the team. He's also insightful regarding the look and feel of our standalones.

He works patiently and is hard-working. He knows what he wants to achieve and is on his way to achieving it.

I know right now he might be caught up with all the prototyping tasks, but I look forward to working with him on other web-dev tasks/projects as well.
