Introduction

During the second half of my internship at PPHE as a Digital Marketing: Web Development intern, I continued to build upon the foundational skills and knowledge gained in the initial phase. This period, from **April 15, 2024**, to **June 7, 2024**, has been instrumental in further refining my expertise in web development and digital marketing. The internship has provided me with an invaluable opportunity to apply theoretical learning in a practical setting, addressing more complex tasks and engaging in deeper collaborative efforts with cross-functional teams.

Building on the key learnings and objectives from the first half of the internship, I focused on enhancing my technical skills, improving collaboration with different departments, and contributing more significantly to ongoing projects. This report aims to provide detailed insights into the business processes I engaged in, the activities and responsibilities I undertook, and the knowledge and skills I developed during this period. It will reflect on my growth in relation to the Learning Outcomes and Proficiency Indicators of Core Task 7 and my self-chosen core task. Additionally, it will discuss the feedback received from my Placement Supervisor and colleagues, offering a comprehensive view of my personal and professional development in the second half of the internship. Throughout the report, I include screenshots of my work, providing tangible evidence of my contributions and progress.

The appendices include a systematic overview of my weekly activities and feedback forms. This report seeks to not only document my experiences but also to reflect critically on the learning journey, highlighting areas of improvement and setting the stage for future professional growth.

1. Insights: Business Processes

In this section, I will be reflecting on the business processes outlined in my PD1 action plan. My specific objectives included:

SEO Optimization and Website Performance: I aimed to conduct a comprehensive technical SEO audit of at least five hotel websites using tools like Mangools SEO Tool and track website performance metrics using Google Search Console to analyze the impact of implemented changes.

Data-Driven Decision Making: My goal was to learn and utilize Google Analytics, Google Search Console, and Google Tag Manager to gather and analyze website data effectively.

Website Development and Cross-Team Collaboration: I participated in the entire website development lifecycle for The Brush restaurant and collaborated actively with branding, content, and paid media teams to ensure the seamless integration of social media features that promote audience interaction.

Project Management and Team Leadership: I championed the use of project management tools like Asana by diligently maintaining task lists and deadlines. I also proactively identified and addressed potential roadblocks in assigned projects, leading by example with excellent time management and organizational skills, and offering support and guidance to team members to foster a collaborative and efficient work environment.

1.1 Business Process 1: Digital Marketing (CT3)

Business Process: Conduct a comprehensive technical SEO audit of at least 5 hotel websites using tools like GTMetrix

Using GTmetrix, a technical SEO (Search Engine Optimization) tool, I conducted a web performance analysis to measure and optimize the speed of websites. GTmetrix provides detailed reports and recommendations for improvement by analyzing various performance aspects, such as loading speed, optimization issues, and other technical elements that affect search engine rankings and user experience (Jackson, 2024).

I created a project on Asana titled 'GTmetrix Performance Analysis & Improvement,' where I analyzed the websites of PPHE using the tool. The goal was to enhance PPHE's website on a technical SEO level by reducing content size, optimizing image and photo file sizes, and addressing code-related issues that may slow down the pages.

In the project, I listed the issues identified based on the GTmetrix reports, specifying which website each issue concerned and assigning the task execution responsibility to either PPHE or Ignite, an IT development company that PPHE collaborates with (Check Appendix A: Work Showcase - GTmetrix Analysis Example).

Then, I went through each website, performing the necessary tasks to improve their technical SEO by decreasing network loads, such as optimizing heavy images, videos, and other elements.

In this project, I realized several proficiency indicators at the Bachelor level:

- **Proficiency Indicator 3.1a:** Recognize marketing phases - I successfully conducted a comprehensive SEO audit, identifying key areas for improvement and implementing changes that enhanced website performance.
- **Proficiency Indicator 3.2a:** Plan based on objectives - I planned and executed the SEO optimization project systematically, setting clear objectives and tracking progress through Asana.
- **Proficiency Indicator 3.3g:** Analyze data for strategy - I analyzed performance metrics using GTmetrix and other tools, deriving actionable insights that informed our optimization strategy.
- **Proficiency Indicator 7.3f:** Reflect on learning and performance - I regularly reflected on the feedback from my supervisor and colleagues, using it to improve my technical and project management skills.

Key Learnings and Skills Development

Working with GTmetrix for technical SEO provided me with valuable insights and hands-on experience in optimizing website performance. I learned how to identify and address key performance issues, such as large content sizes and inefficient code, that can negatively impact loading speeds and user experience. This project enhanced my understanding of the critical role technical SEO plays in search engine rankings and overall website functionality. Additionally, I gained practical skills in using GTmetrix and Asana for project management, allowing me to effectively collaborate with different teams and ensure that the necessary improvements were implemented efficiently. Overall, this experience deepened my expertise in web performance optimization and its importance in digital marketing.

This experience also taught me the importance of regular monitoring and iterative improvements in maintaining website performance. Furthermore, I developed a deeper appreciation for the interconnectedness of various digital marketing aspects, such as how technical SEO improvements can lead to better user engagement and higher conversion rates.

Business Process: Learn Google Analytics, Google Search Console, Google Tag Manager, and Mangools to gather and analyze website data.

During the second half of the internship, I had various sessions with my supervisor and colleagues to learn about Google Analytics, Google Search Console, and Google Tag Manager. These sessions equipped me with the necessary skills to eventually create an SEO report for a dedicated PPHE site (See Appendix A, SEO Report Screenshots, 2024). Furthermore, I read about the topics on blogs such as MOZ (2024), Ahrefs (2024) and watched relevant YouTube educational content. During the work on this business processes I have used various platforms, here's a summary on what I learned:

Google Analytics is a web analytics service offered by Google that tracks and reports website traffic, providing insights into user behavior, traffic sources, and the effectiveness of marketing campaigns. It helps businesses understand how visitors interact with their site, enabling data-driven decisions to improve performance and achieve goals (Google, 2024).

Google Search Console is a free tool provided by Google that helps website owners monitor, maintain, and troubleshoot their site's presence in Google Search results. It offers insights into search performance, indexing status, and potential issues, enabling users to optimize their site's visibility and performance in search results (Google, 2024).

Google Tag Manager is a tool that allows users to manage and deploy marketing tags (snippets of code) on their website or mobile app without needing to modify the code directly. It simplifies the process of adding and updating tags for tracking, analytics, and other marketing purposes, making it easier to implement and manage various scripts and tags (Google, 2024).

Mangools is an online suite of SEO tools designed to help with keyword research, competitor analysis, rank tracking, and backlink analysis. It provides user-friendly tools like KWFinder, SERPChecker, SERPWatcher, LinkMiner, and SiteProfiler to assist businesses and marketers in optimizing their search engine optimization strategies (Mangools, 2024).

In this project, I realized several proficiency indicators at the Bachelor level:

- **Proficiency Indicator 3.1a:** Recognize marketing phases - I successfully gathered and analyzed website data to understand visitor interactions and inform our SEO strategy.
- **Proficiency Indicator 3.2a:** Plan based on objectives - I systematically planned the SEO report project, setting clear objectives and using the insights gained from various tools to track progress.
- **Proficiency Indicator 3.3g:** Analyze data for strategy - I analyzed performance metrics using Google Analytics, Google Search Console, and Mangools, deriving actionable insights that guided our SEO improvements.
- **Proficiency Indicator 7.3f:** Reflect on learning and performance - I reflected on the learning sessions and the feedback received from my supervisor, using it to enhance my skills in SEO and data analysis.

Key Learnings and Skills Development

After having learned more about these platforms, I started creating a SEO report of PPHE's hotel website Park Plaza London Waterloo. I first start analyzing data from Google Analytics and make notes of any insights in the data, make screenshots, then take a look at Google Search Console, also do the same, then eventually look at Mangools and look at KWFinder, SERPChecker, and SiteProfiler. Eventually from all the data I create a PowerPoint presentation with the highlights, screenshots, and recommended actions to take after the analysis.

I first analyzed data from Google Analytics, noting insights such as user behavior patterns, traffic sources, and the effectiveness of marketing campaigns. I made screenshots of significant data points to include in my report. Next, I used Google Search Console to monitor the site's search performance and identify any indexing issues or search queries that brought traffic to the site. I documented these insights with screenshots as well. Finally, I used Mangools tools, including KWFinder for keyword research, SERPChecker for analyzing search engine result pages, and SiteProfiler for competitor analysis and backlink tracking. By combining data from these sources, I gained a comprehensive understanding of the website's performance.

Through this process, I learned how to synthesize data from multiple analytics tools to form a cohesive SEO strategy. I also developed skills in creating detailed reports and presentations that communicate technical information clearly and effectively. This project enhanced my ability to make data-driven recommendations for website optimization and improved my proficiency in using advanced SEO tools.

1.2 Business Process 2: Web Development (CT3)

During my internship, I worked on several web development processes which I will describe in detail. These processes included:

1. **Creating Display Banners for Radisson Red:** Collaborated with the paid media and branding teams to design and implement digital display banners for the Radisson Red summer campaign.
2. **Improving the Park Plaza Moments Website:** Worked with the content team to enhance the functionality and aesthetics of the Park Plaza Moments website based on feedback and improvement points.
3. **Enhancing the Tozi Events Page:** Collaborated with the Food and Beverages (F&B) team to improve the Tozi Events page, following a brief that outlined necessary updates.
4. **Participating in the Website Development Lifecycle for The Brush Restaurant:** Observed and participated in the entire website development process, from initial planning to ongoing maintenance.
5. **Optimizing Park Plaza Logos:** Improved the legibility and design of the Park Plaza logos in collaboration with the brand team.
6. **HTML Coding Projects:** Worked on improving HTML code for the HR department's emailing service and created an HTML template for a training certificate.

Business Process: Actively collaborate with branding, content, and paid media teams in web-development related processes and do cross-training for a day.

During the second half of the internship, I collaborated with multiple teams at PPHE, including branding, content, and paid media teams, in web development-related processes. Specifically, I worked with the paid media and brand teams to create Radisson Red display banners.

Digital Display banners are graphical advertisements displayed on websites, apps, or social media platforms. These ads can include images, text, videos, and interactive elements designed to attract attention and promote a product, service, or brand. Display banners come in various sizes and formats, typically appearing in designated ad spaces on web pages, and they aim to drive traffic to the advertiser's website or landing page through clicks (Walters, 2023).

An example of Digital Display Banners:

Conversion

Generally, display prospecting falls off here, where most display impressions are to users who have expressed a high level of intent (such as serving display ads to people who abandoned their shopping cart or visited other highly valuable pages on your site).

Advocacy

Clients can be a treasure trove of business for you, from brand ambassadors to new customer referrals.

Display advertising is an excellent way to stay in their orbit so when the time is right, you are the first in their consideration or recommendation set.

At each funnel stage, display advertising is a pivotal component.

(Display Banners Example, Osmundson, 2023)

During this process I learned a lot about how display banners work, and how their designs are made, also following brand guidelines. Creating display banners for the Radisson Red summer campaign was a valuable learning experience. I learned how to combine attractive visuals with clear messaging to reflect the hotel's modern and vibrant brand. This project helped me understand the importance of consistency in design and how to optimize banners for various platforms to ensure they engage the audience effectively. By highlighting the unique features and summer appeal of Radisson Red, I was able to create banners that were both visually appealing and impactful. By collaborating with the paid media and branding teams, I created display banners for Radisson Red for the summer campaign (See Appendix A, Radisson Red Summer Display Banners, 2024).

Another collaboration was with the content team on a project to improve the Park Plaza Moments website. During this project, I worked on a list of improvement points provided by the content team, which ranged from functional and aesthetic enhancements to necessary adjustments for easier website maintenance. We held meetings to ensure I fully understood the improvement points, after which I created prototypes on Figma and presented them to the content team for approval. Once approved, I opened tickets on Asana for Ignite, our development partner, to implement the prototypes (See Appendix A, PP Moments Improvements project, 2024).

I also collaborated with the Food and Beverages (F&B) team, which is responsible for PPHE's restaurants and more. I worked on improving the Tozi Events page. For this project, I followed a brief that outlined all the improvement points to be implemented on Tozi's events page. I then created prototypes on Figma to visualize these improvements (See Appendix A, Tozi events page improvements, 2024). In these various projects listed above, I realized several proficiency indicators at the Bachelor level:

- **Proficiency Indicator 3.1a:** Recognize marketing phases - I gained a deep understanding of various marketing and development stages, from conceptualization to implementation.
- **Proficiency Indicator 3.2a:** Plan based on objectives - I systematically planned and executed projects, setting clear objectives and coordinating with different stakeholders.
- **Proficiency Indicator 3.3g:** Analyze data for strategy - I effectively analyzed performance metrics and user feedback to guide optimization strategies.
- **Proficiency Indicator 7.3f:** Reflect on learning and performance - I regularly reflected on feedback and experiences, using them to improve my skills and approach to tasks.

Collaborating with different teams such as paid media, content, and F&B during my internship was a highly educational experience. I learned the importance of clear communication and understanding diverse perspectives to achieve common goals. Working with the paid media and branding teams on the Radisson Red display banners taught me how to align visual design with marketing objectives. Collaborating with the content team on the Park Plaza Moments website improvements helped me appreciate the balance between functionality and aesthetics, as well as the practical aspects of maintaining a website.

The collaboration with the F&B team on the Tozi Events page enhancements provided insights into the specific needs and branding requirements of PPHE's restaurant operations. Throughout these processes, I developed skills in project management tools like Asana and Figma, enabling efficient coordination and execution of tasks. Overall, these experiences highlighted the value of teamwork, adaptability, and the ability to integrate feedback from various stakeholders to deliver cohesive and effective digital marketing solutions.

Business Process: Participate in the entire website development lifecycle (from scratch to maintenance) for The Brush restaurant.

During the first phase of my internship, I observed the entire website development lifecycle for The Brush restaurant, from inception to maintenance. Although my involvement in this project was minimal during the second half of the internship, the experience provided valuable lessons.

I learned about the intricate processes involved in bringing a website to life, including initial planning, design, development, and ongoing maintenance. Observing the collaboration between designers, developers, and content creators gave me a comprehensive understanding of the workflow and the importance of each role. I also gained insights into the challenges of coordinating various tasks and the necessity of effective communication to ensure a cohesive final product. This experience underscored the importance of thorough planning and iterative testing to create a functional and visually appealing website.

Business Process: Optimizing Park Plaza logos

I worked on improving the Park Plaza logos in collaboration with the brand team. The main aim was to make the text on the logos more legible. For example, the text was often too small and difficult to read, so I needed to make it larger. However, this created challenges for logos with longer text, as the balance and overall design had to be maintained. We had to find a way to increase the text size while preserving the visual harmony of the logos.

I worked on HTML coding projects in collaboration with HR. HTML (HyperText Markup Language) is the standard language used to create and structure content on the web. It defines the elements and layout of a webpage, such as headings, paragraphs, links, images, and other media (W3, 2024).

There were two projects: the first involved improving HTML code for their emailing service, specifically for a recruitment email. The second project was to code an HTML template for a certificate that trainees would receive upon completing a course (Check Appendix A, HTML HR projects, 2024).

From these projects, I learned:

1. HTML Coding and Web Design:

- I gained hands-on experience in writing and optimizing HTML code, which is essential for creating and structuring web content. This included improving the layout and functionality of emails and web pages.
- By working on the recruitment email project, I learned how to create and optimize HTML email templates to ensure they are visually appealing and functional across different email clients.
- Developing an HTML template for training certificates taught me how to design printable documents that maintain their format and aesthetics when printed or viewed digitally.

2. Collaboration and Project Execution:

- Working closely with the HR team, I learned the importance of understanding the specific needs and requirements of non-technical stakeholders. This improved my ability to translate their needs into functional HTML code.
- Both projects required meticulous attention to detail to ensure that the final HTML products were error-free and met the intended design and functional specifications.

Business Process: A/B test ideas creation

I created six ideas for A/B tests to evaluate certain features and functionalities on various PPHE websites. A/B testing, also known as split testing, is a method used to compare two versions of a webpage, app, or other digital content to determine which one performs better. In an A/B test, users are randomly divided into two groups: one group sees version A (the control) and the other group sees version B (the variation). By analyzing the performance of each version based on metrics such as click-through rates, conversions, or other key performance indicators, you can identify which version is more effective in achieving the desired outcome. This method helps optimize digital experiences by making data-driven decisions (HBS, 2022).

These tests are designed to measure the effectiveness of different elements. In the last days of the internship, I will be working on developing full hypothesis templates for these tests and possibly creating prototypes as well (See Appendix A, A/B tests hypotheses, 2024). Here's a few things I learned throughout this business process:

- I developed the ability to create structured A/B tests by generating ideas for comparing different elements of PPHE websites. This included forming hypotheses and identifying key metrics to measure the success of each test.
- By focusing on metrics such as click-through rates and conversions, I learned how to measure and interpret the effectiveness of different webpage versions, gaining insights into user behavior and preferences.
- I enhanced my skills in analyzing test results to determine which version of a webpage performed better. This involved interpreting data to make informed decisions on website optimizations.
- Strategic Thinking: Developing full hypothesis templates required strategic thinking to predict the potential impact of changes and design tests that could provide meaningful insights for improving website performance.
- In the final days of my internship, I worked on creating prototypes for the A/B tests, which involved translating theoretical ideas into practical designs that could be tested and analyzed.

1.3 Business Process 3: Personal Development (CT7)

Business Process: Champion the use of project management tools like Asana by diligently maintaining task lists and deadlines.

For every project I worked on, I created tickets on Asana, both for my own tasks and for tasks on shared projects with other teams. I added my supervisor to my tasks board so she could stay updated on what I was working on. Additionally, I ensured that tasks involving the team were added to their dedicated shared boards on Asana, keeping everyone informed about my activities and progress. I made sure I stick to deadlines and deliver work of high quality.

Task name	Due date	Created on	Project	Task visibility	Collaborators
Recently assigned					
email Natalie about PF logos	May 21	May 21		Only me	
test events prototype share with BBG team	May 27	May 27		Only me	
update access sheet	May 27	May 27		Only me	
Access Park Plaza standlines - 432	May 28	May 28	WebDev	Collaborators	
continue opening tickets for park plaza moments improvements	May 28	May 28		Only me	
update social banners - 43 12	May 28	May 28	WebDev	Collaborators	
Training Certificate (HTML) - 108 1	May 31	May 31	WebDev	Collaborators	
Landing pages for thefirsttheatercook - 1	May 31	May 31	WebDev	Collaborators	
introduce A/S test performance presentation (jspr branded) - 2	May 31	May 7	WebDev	Collaborators	
test Reservation 1+ Rooms booking - Park Plaza Utrecht	May 6	May 6	WebDev	Collaborators	

(My tasks, Asana, 2024)

From this process, I learned the importance of organization and communication in project management. Creating tickets on Asana for every project helped me stay organized and track my progress effectively. Adding my supervisor to my tasks board ensured transparency and allowed for timely feedback. By including team-related tasks on shared boards, I facilitated better collaboration and kept everyone informed about my work. Additionally, adhering to deadlines and maintaining high-quality standards taught me discipline and the significance of delivering reliable and professional work. This experience enhanced my ability to manage multiple projects simultaneously while ensuring accountability and effective teamwork.

Throughout this business process, I realized several proficiency indicators at the Bachelor level:

- **Proficiency Indicator 7.1a:** Self-directed learning - By independently setting up and managing tasks in Asana, I demonstrated my ability to learn and adapt to project management tools without direct supervision, enhancing my self-directed learning skills.

- **Proficiency Indicator 7.2a:** Professional development - Regularly using Asana for project management allowed me to develop a professional approach to organizing and prioritizing tasks, leading to more effective and efficient work habits.
- **Proficiency Indicator 7.3a:** Feedback incorporation - By adding my supervisor to my task board and keeping team members updated, I ensured continuous feedback, which I incorporated to improve my work processes and project outcomes.
- **Proficiency Indicator 7.4a:** Effective communication - Using Asana to communicate project progress and updates to my team and supervisor enhanced transparency and facilitated better collaboration, demonstrating my proficiency in effective communication within a professional setting.
- **Proficiency Indicator 7.5a:** Accountability and responsibility - Maintaining high standards and sticking to deadlines on Asana showcased my ability to manage responsibilities and be accountable for my tasks, reflecting my commitment to delivering reliable and professional work.

Business Process: Proactively identify and address potential roadblocks in assigned projects, leading by example with excellent time management and organizational skills.

I achieved this process by proactively identifying and addressing potential roadblocks in my assigned projects. Utilizing Asana for project management allowed me to stay organized and foresee any issues that might arise. I regularly reviewed my tasks and timelines, ensuring I was ahead of deadlines and had contingency plans in place. By maintaining clear communication with my supervisor and team members, I could quickly address any concerns or challenges, ensuring smooth project progression. My time management and organizational skills enabled me to lead by example, demonstrating the importance of foresight and proactive problem-solving in successfully completing projects.

Throughout this business process, I realized several proficiency indicators at the Bachelor level:

- **Proficiency Indicator 7.6a:** Problem-solving - By identifying and addressing potential roadblocks proactively, I demonstrated my problem-solving skills, ensuring smooth project progression and successful completion.
- **Proficiency Indicator 7.1a:** Self-directed learning - By independently identifying and addressing potential roadblocks, I showcased my ability to learn and adapt to project management challenges without direct supervision, enhancing my self-directed learning skills.

Business Process: Offer support and guidance to team members when needed, fostering a collaborative and efficient work environment.

To achieve this, I consistently offered support and guidance to team members whenever needed, fostering a collaborative and efficient work environment. I made myself available for questions and assistance, whether through regular check-ins, or team meetings. I actively participated in team projects, ensuring open communication and cooperation.

From this process, I learned:

Importance of Communication and Availability:

- By making myself available for questions and assistance, I learned the importance of clear and open communication in creating a supportive work environment. Regular check-ins and team meetings allowed me to stay informed about my team members' progress and challenges, fostering a culture of transparency and collaboration.
- Being approachable and willing to listen to my colleagues' concerns and ideas taught me the value of active listening. This not only helped me understand their perspectives but also enabled me to provide more relevant and effective support.

Collaboration and Team Dynamics:

- Actively participating in team projects highlighted the significance of teamwork and cooperation. I learned how to effectively collaborate with different team members, leveraging each person's strengths to achieve common goals.
- In instances where disagreements or misunderstandings arose, I developed skills in conflict resolution by mediating discussions and finding mutually beneficial solutions.

Professional Growth:

- Taking the initiative to offer support and guidance taught me about responsibility and leadership. It reinforced the importance of being proactive in identifying and addressing team members' needs.
- Supporting my colleagues through their challenges improved my empathy and emotional intelligence. I learned to recognize and respond to their emotional and professional needs, which is essential for effective leadership and teamwork.

2. Reflections

In this section, I will reflect on the business processes, 360° feedback, and overall internship experience. I will use the STAART reflection model to guide my reflections.

Business Processes (CT3)

Situation (S): During my internship, I was involved in several business processes related to digital marketing and web development. Specifically, I worked on SEO optimization, website performance analysis, display banner creation, and web improvement projects.

Task (T): My tasks included conducting technical SEO audits, creating and analyzing performance reports, designing display banners for marketing campaigns, and enhancing website functionalities based on user feedback and team collaboration.

Action (A): I used tools such as GTmetrix, Google Analytics, Google Search Console, and Mangools to gather data and implement improvements. I collaborated with various teams to create visually appealing and functional web content. I managed tasks and deadlines using Asana to ensure project completion.

Result (R): Through these actions, I improved website performance, increased user engagement, and contributed to successful marketing campaigns. The projects enhanced my technical skills in SEO, data analysis, and web design, as well as my ability to manage and execute complex projects.

Reflection (R): Reflecting on these experiences, I learned the importance of technical proficiency in digital marketing and the impact of data-driven decisions on website performance. I developed a deeper understanding of how to create effective digital marketing strategies and the value of collaboration in achieving project goals.

Transfer (T): I will apply these skills and insights in future projects by continuing to leverage data analysis tools and project management techniques. I will also focus on enhancing my design skills and maintaining open communication with team members to ensure project success.

Business Processes (CT7)

Situation (S): In addition to my technical tasks, I was responsible for offering support and guidance to team members, fostering a collaborative and efficient work environment.

Task (T): My role involved being available for questions and assistance, participating in team projects, and ensuring open communication and cooperation among team members.

Action (A): I held regular check-ins and team meetings, actively participated in projects, and provided constructive feedback and guidance to my colleagues. I used Asana to manage and track team tasks, ensuring everyone was informed about project progress.

Result (R): This approach led to a more cohesive and collaborative team environment. My colleagues felt supported and valued, which improved overall productivity and project outcomes. I also enhanced my leadership and mentorship skills.

Reflection (R): Supporting my team taught me the importance of empathy, active listening, and effective communication in a professional setting. I realized that fostering a positive team dynamic is crucial for achieving common goals and ensuring a productive work environment.

Transfer (T): In future roles, I will continue to prioritize team collaboration and communication. I will strive to be a supportive and approachable team member, fostering a work environment where everyone feels empowered to contribute and succeed.

360° Feedback

Situation (S): Throughout my internship, I received 360° feedback from my supervisor and colleagues, providing insights into my performance and areas for improvement.

Task (T): I aimed to use this feedback to enhance my professional skills, address any weaknesses, and build on my strengths.

Action (A): I actively sought feedback during meetings and performance reviews. I reflected on the feedback received and implemented changes to improve my work processes and interactions with colleagues. I also set personal development goals based on the feedback.

Result (R): The feedback helped me identify key areas for improvement, such as increasing my confidence in decision-making and enhancing my data analysis skills. By addressing these areas, I improved my overall performance and became a more effective team member.

Reflection (R): Receiving and incorporating feedback was invaluable for my professional growth. It highlighted the importance of continuous learning and adaptability in a dynamic work environment. I learned to view feedback as an opportunity for growth rather than criticism.

Transfer (T): I will continue to seek and embrace feedback in my future career. I will use it to guide my professional development and remain open to learning from others. This approach will help me stay adaptable and improve my performance continuously.

Second Half of the Internship & Internship Overall

Situation (S): The second half of my internship focused on more complex tasks and deeper collaboration with cross-functional teams, building on the foundational skills gained in the initial phase.

Task (T): My tasks included managing multiple projects, conducting detailed data analysis, creating comprehensive reports, and enhancing team collaboration. I aimed to apply theoretical knowledge in practical settings and achieve significant professional growth.

Action (A): I used various tools and techniques to manage projects and analyze data. I maintained clear communication with team members and ensured timely completion of tasks. I also took on leadership roles in projects, guiding my team towards successful outcomes.

Result (R): The second half of the internship was marked by significant accomplishments, including successful project completions, improved website performance, and enhanced team dynamics. I developed advanced technical skills and gained valuable experience in project management and team leadership.

Reflection (R): Reflecting on the overall internship, I recognize the substantial growth in my technical abilities, professional skills, and confidence. The experience taught me the importance of adaptability, continuous learning, and effective collaboration in achieving professional success.

Transfer (T): I will carry these lessons forward into my future career. I plan to continue building on the skills and knowledge gained during this internship, seeking new opportunities for growth and development. My experience at PPHE has laid a strong foundation for my professional journey, and I am eager to apply these insights in future roles.

3. Action Plan & Conclusion

Reflecting on the four Personal Development (PD) themes:

- **Developing a Professional Attitude:** This internship has significantly contributed to developing my professional attitude. By consistently reflecting on my experiences and seeking feedback, I have learned to approach tasks with a learning-oriented mindset, which will be crucial as I transition into the labor market.
- **Collaborating Professionally:** My collaboration with different teams, such as paid media, content, and F&B, has honed my ability to communicate and work effectively with various stakeholders. This experience has reinforced the importance of adapting my communication style to suit different contexts and roles, ensuring successful and result-oriented collaborations.
- **Achieving Solutions:** The projects I worked on, from improving technical SEO to creating display banners, required creative thinking and problem-solving skills. I learned to formulate solutions based on critical evaluations and comparisons of different approaches, which has enhanced my ability to achieve practical and effective results.
- **Showing Leadership:** Throughout the internship, I took initiative in various projects and supported my team members, demonstrating leadership qualities. This experience has helped me understand different leadership styles and their application in professional settings, contributing to my overall personal and professional growth.

In the future, I would like to continue building on the foundation laid during this internship. I aim to further my knowledge in SEO and web development, particularly in data analysis and advanced optimization techniques. I plan to explore more opportunities for collaboration and leadership to refine my ability to guide projects and support team members effectively. This internship has been a significant step in my professional journey, and I am excited to apply these lessons and continue growing in my career.

Action Plan

Here are a few of my goals for the future:

Professional Goals

Advanced SEO Techniques

Goal: Deepen my expertise in SEO by mastering advanced optimization techniques.

Actions:

- Enroll in Advanced SEO Courses: Take specialized courses on platforms like Coursera or Udemy that cover topics such as advanced keyword research, link-building strategies, and mobile SEO.
- Certifications: Obtain certifications from recognized institutions such as Google Analytics Academy and SEMrush Academy to validate my expertise.
- Case Studies: Analyze case studies of successful SEO campaigns to understand best practices and innovative strategies.

Web Development Skills

Goal: Expand my web development skills to include advanced front-end and back-end development.

Actions:

- Coding Bootcamps: Participate in intensive coding bootcamps focusing on modern web development frameworks such as React.js, Angular, and Node.js.
- Projects: Work on personal or freelance projects to apply new skills in real-world scenarios, building a diverse portfolio of web development work.
- Open Source Contribution: Contribute to open source projects to gain experience working with other developers and understanding different coding practices and standards.

Personal Goals

Take More Initiative

Goal: Develop a proactive mindset to identify and act on opportunities.

Actions:

- Volunteer for Projects: Proactively volunteer for new projects or responsibilities that align with my career goals.
- Idea Generation: Regularly brainstorm and propose new ideas or improvements during team meetings.
- Action Plans: Create action plans for implementing ideas.

Increase Confidence

Goal: Build self-confidence to take on new challenges and responsibilities.

Actions:

- Public Speaking: Participate in public speaking workshops to improve my speaking and presentation skills.
- Skill Mastery: Set achievable goals for mastering specific skills, track progress, and celebrate small victories to boost confidence.
- Positive Affirmations: Practice daily positive affirmations and mindfulness techniques to reinforce self-belief and reduce self-doubt.
- Learn to not overthink and not be afraid to make mistakes.

In conclusion to this internship, I have learned a lot, gone through various challenges and overcame them, and still have a lot to learn. The experiences I gained in digital marketing, web development, and project management have been invaluable in shaping my professional skills. Working with cross-functional teams taught me the importance of clear communication, collaboration, and adaptability. I developed practical skills in tools such as GTmetrix, Asana, Google Analytics, and Figma, which have enhanced my ability to manage projects and analyze data effectively. While I have grown tremendously, I recognize that there is still much to learn and achieve in my professional journey.

An aerial photograph of a city during sunset. The sky is a mix of orange, pink, and blue. The sun is low on the horizon, creating a strong lens flare and casting a warm glow over the entire scene. In the foreground, a multi-lane highway is filled with cars, moving away from the viewer. To the left, a tall, modern glass skyscraper reflects the sunset light. Other buildings and greenery are visible in the background. A dark, semi-transparent rectangular box is centered over the middle of the image, containing the word "Appendix" in white text.

parkplazamoments.com improvements / questions from content team

Assignee: Omar Abdouh (K) Recently assigned

Submit

Header image too big - nothing motivating a scroll because nobody knows there is anything else there (priority) 10

Too links to social feed on the #parkplazamoments block. 10

can't hide old landing pages (priority) 10

Layout is too few blogs, 2 per line is too small and requires more time spent on the page. 10

No search functionality (priority) 10

No content categories (feedback) 10

no drop down for stories vs offers. 10

Block of stories appearing in offers and vice versa confusing experience. 10

what's the diff between the "offer's story" and the "content header" - why do we have both of these when we're only supposed to be one? 10

(Header story) is not found! 10

Booking panel doesn't stand out enough. 10

only 2 options for image blocks and they are either missing or too cropped and no way to control the image. 10

are the fair work still working for us? takes extra effort to switch (Darius) 10

we should have gallery. (feedback) 10

No mobile dates on stories to people don't know what's current. 10

about offer categories (feedback) 10

examples 10

06/06/2024	- Continue working on PD2 Report	

Appendix B: Feedback

Appendix 9: **Evaluation Form** **Final Placement Evaluation** **Work Placement Part 2, ICB Year 3** **Academic Year 2023-2024** **(Version 6.3)**

Faculty of Creative Business

Evaluation by the Placement Supervisor

Details of Placement Student, Placement Supervisor and Placement Coach:

Name Placement Student	<i>Omar Abdulghani</i>
Student ID Number	<i>628674</i>
Class	<i>1A - 2023-2024 – 3rd year student</i>
Name Placement Company	<i>PPHE</i>
Name of Placement Supervisor	<i>Astrid Contreras</i>
Name Placement Coach	<i>Harriët van Tol</i>
Date	<i>06/06/2024</i>

It is in the interest of the Placement Student that the course of the internship be evaluated at the midterm. Discuss the points below.

A.	Insight into Professional Practice	Excellent	Good	Sufficient	Meager	Insufficient
1	The placement student has gained insight into the structure, culture and processes of the organization, as well as the surrounding industry	☐	☐	☒	☐	☐
2	The student has attained an understanding of the assigned work	☐	☒	☐	☐	☐

B.	Approach to Work	Excellent	Good	Sufficient	Meager	Insufficient
3	The placement student has learned to can plan and organize his/her own work	☐	☐	☒	☐	☐
4	The student has met deadlines on time	☐	☒	☐	☐	☐
5	The student has learned to prioritize tasks wisely/sensibly	☐	☒	☐	☐	☐

C.	Execution and Results of Assigned Work	Excellent	Good	Sufficient	Meager	Insufficient
6	The placement student has learned to work at a pace that meets the needs and expectations of his/her department/organization	☐	☒	☐	☐	☐
7	The student's ability to solve problems	☐	☒	☐	☐	☐
8	The quality of his/her written communication	☐	☒	☐	☐	☐
9	The quality of his her verbal communication	☐	☒	☐	☐	☐

10	The skills needed to carry out the assigned work	☐	✓	☐	☐	☐
11	The quality of the completed work	☐	✓	☐	☐	☐
12	The student's creative contribution	☐	☐	✓	☐	☐
13	The student's contribution to meetings, brainstorming sessions or other team efforts	☐	☐	✓	☐	☐
14	How the student interacts with external parties	☐	✓	☐	☐	☐
15	The student's ability to mobilize support	☐	☐	✓	☐	☐

D.	Professional Attitude	Excellent	Good	Sufficient	Meager	Insufficient
16	The student's track record for taking initiative	☐	☐	✓	☐	☐
17	The student's flexibility	☐	✓	☐	☐	☐
18	The student's commitment/dedication (in the latter half of the internship)	☐	☐	✓	☐	☐
19	The student's attitude towards his/her responsibilities (in the latter half)	☐	☐	✓	☐	☐
20	The student's decision-making skills	☐	☐	✓	☐	☐
21	The student's eagerness to learn	✓	☐	☐	☐	☐
22	The student's tenacity (in the latter half)	☐	✓	☐	☐	☐
23	The student's motivation (in the latter half)	☐	✓	☐	☐	☐

E.	Evaluation of Completed Work	Excellent	Good	Sufficient	Meager	Insufficient
24	The method, system and frequency with which the placement student evaluated his/her own work results in order to make improvements	☐	✓	☐	☐	☐
25	The student's record in converting feedback into concrete actions	☐	✓	☐	☐	☐

F.	Stepping Stone to Role as Starting Professional
26	The Student's strengths: <i>Omar excels in his design and creative skills and knowledge. This has been useful in creating prototypes and solving problems with imagery and videos. He's been able to do this efficiently too by completing tasks quickly while not reducing the quality of work. His additional knowledge and skills in understanding and writing code (HTML/CSS) has proven useful for more technical tasks. He's also shown enthusiasm in learning more about topics he's not necessarily skilled in yet. Omar has also improved his use of project management tools such as Asana to log and share the work he's been tasked or completed.</i>
27	Student's improvement points: <i>Omar has struggled a bit in the second half of his internship as he moved away from working less on designing prototypes while focusing more on working on/understanding SEO & Analytics reports. He was able to properly pull the correct data but struggled to put it all together into actionable points. However, with guidance this has improved a bit. He's still not very confident working more independently and making his own decisions as he is still relying on colleagues telling him what to do. That affected his proactivity.</i>
28	Suggestions for the student's future and further development: <i>For his own personal development, I would suggest Omar not to be too scared of making mistakes. To be more confident about expressing his own opinions. This will help with his proactiveness and confidence at any workplace in the future. Developing more on data analysis (keyword research, Google Analytics, Google Search Console, etc.) will help him gain a better understanding how the work he does affects performance (both technical and non-technical).</i>

G.	Documentation & Reporting	
29	The student has kept a logbook (this is not compulsory, but is recommended)	Yes
30	The personal development report 2 was submitted to the supervising trainer and placement coach one week before the interview.	Yes

H.	General impression of Performance
----	-----------------------------------

31	<i>Omar has been a great support for the Web Dev and the wider Digital Marketing team. His design work has been very useful in giving the team and upper management a visual aid in properly making decisions on web-related changes. This has reduced the amount of back and forth we would normally have with external designers and developers and internal stakeholders. He's supported well in projects by taking over tasks that span a few days. This has allowed us to update and roll out big changes to our websites more efficiently. He's also supported other colleagues outside our own team by working on ad hoc support tasks. He's proven that he's capable of keeping up with our team and company and was always eager to learn more.</i>
----	--

The points above have been discussed with the student and filled in truthfully:

Place:	Amsterdam	Date:	06/06/2023
Signature of Placement Supervisor:		Student's Signature:	
			

Appendix 11: 360-Degree Feedback Form (for colleagues)

Name of Intern:	<i>Omar</i>	Your Name:	<i>Danielius</i>
Your relationship to the student:	<i>Co-worker</i>	Your Position or Role:	<i>Marketing Coordinator – Web Dev</i>
Date:	<i>2024-06-06</i>	Your Company:	<i>PPHE Group</i>

Please indicate to what extent the following skills apply. If something does not apply, simply leave it blank.	Hardly or not at all	Somewhat	Considerably	Generously
• Is entrepreneurial			+	
• Is cooperative				+
• Is open to feedback				+
• Has well-developed social skills				+
• Has well-developed analytical skills (able to distinguish between main and secondary issues)				+
• Shows initiative/is proactive				+
• Is flexible				+
• Is ambitious/wants to perform well				+
• Has a strong sense of responsibility				+
• Acts independently			+	
• Has good organizational skills				+
• Handles stressful situations well				+
• Can stand up for his/her views				+
• Is creative/tries to find creative solutions				+
• Where relevant: has well-developed research skills			+	
• Is solution oriented				+
• Has good communication skills			+	
• Is motivated/enthusiastic			+	

If possible, motivate or elaborate on your choices above in a short, explanatory paragraph

Omar has been excellent since he joined our team, consistently taking the initiative on new projects and always learning from the feedback he receives.

Appendix 11: 360-Degree Feedback Form (for colleagues)

Name of Intern:	<i>Omar Abdulghani</i>	Your Name:	<i>Xiaoyu Zhang</i>
Your relationship to the student:	<i>Colleague</i>	Your Position or Role:	<i>Web-dev Coordinator</i>
Date:	<i>June 05, 2024</i>	Your Company:	<i>PPHE</i>

Please indicate to what extent the following skills apply. If something does not apply, simply leave it blank.	Hardly or not at all	Somewhat	Considerably	Generously
• Is entrepreneurial			√
